SERA MEMBERSHIP

Full Repeater Membership

(A Membership for Repeater Owners & Sponsors)

Any repeater owner or sponsor may join SERA as a Full Member if they have a properly coordinated and operating repeater on the air. A Full Membership application, coordination information (if not on file), and the correct membership fee should be submitted.

Two individuals representing the full member repeater, named and listed on the application by the owner, receive the *Repeater Journal* each quarter.

The two Full Member Representatives have voting privileges in SERA elections and may be eligible to hold elective offices within the organization. The full member repeater is also recognized as a SERA supporter in the repeater index with a ☺ symbol. A Full Member application is available in this issue of the Repeater Journal, and on the SERA web site: **www.sera.org**.

Full Member dues are $20/year, pro-rated by quarter. All full memberships expire on December 31st of each year.

Associate Membership

(A Membership for Repeater Users)

Amateurs Radio operators, especially repeater users, are invited to join SERA as Associate Members. Only $10 per year will enable you to support the organization and receive the *Repeater Journal*. Associate Members may hold appointive offices within SERA, but do not have voting privileges.

Associate Membership begins in the quarter you join, and dues are not pro-rated. Renewals are due in the same quarter in subsequent years.

REPEATER JOURNAL MAILING

The *Repeater Journal* is mailed Bulk Rate during the first week of the cover date. Delivery takes one to two weeks. Notify the **editor** if you have not received your copy by the 1st of the following month. **The Journal is *not* forwarded to new addresses. If you move, send your new address to the editor!**

Celebrating 50 years in 2006

Pre-Registration tickets will already be in the barrel.

Note: No member of the Shelby Amateur Club or immediate family is eligible to win any awards

Ruth Hampton

---This is an excerpt from the obituary for Danny Hampton's Mother, Ruth. Danny, K4ITL, has been active in the NC FM Association/CVRA/SERA for many, many years. It is with regret that we acknowledge this sad time in the life of such a highly respected member of the Amateur Radio Fraternity. (Tom, N4IOZ)

Ruth Ervin Hampton, (87), of 5453 Rock Service Station Road, Raleigh, formerly of 402 Iris Avenue, Kannapolis, went to be with her Lord on March 24, 2006. She was at Wake Medical Center for just a few hours when she passed away. She was born in 1918 and was the third child of the late Willie Lee and Scottie Hyde Ervin.

She was predeceased in 1995 by her husband of 52 years, Wade Daniel Hampton, Sr., of Kannapolis. They were married by Army Chaplain Orville Wright in 1942 at the Army Base in Paris, TN. She always beamed when she said, "We were married in Paris by Orville Wright." When the Army sent Wade overseas during WWII, Ruth remained in Kannapolis to await the birth of their only child, Wade Daniel Hampton, Jr. (Danny), on September 16, 1944. Danny was 15 months old when his dad returned from the war to live with his family in Kannapolis. Ruth worked at Fieldcrest Cannon Mills in Kannapolis, where she hemmed towels for nearly 50 years.

She is survived by her son, Wade Daniel Hampton, Jr., "Danny," and his wife Rose who lovingly brought her into their home after Wade Sr. died in 1995. She was very ill when she came to Raleigh but soon regained much of her health until shortly before her death. She never failed to tell others, "I wouldn't be here if it wasn't for the love and care of Danny & Rose." She enjoyed being with them during the final years of her life. She prided herself on her contributions to the family and doing her little 'chores".

Ruth is also survived by a grandson, Danny Keith Hampton and wife Debby of Creedmoor, NC, granddaughter, Carol Lynn Hampton, and fiancé, Jon Thomas, of Apex, NC, and Jon's son, Nathaniel Quinn Thomas, Cambridge Springs, PA; great granddaughter, Jessica Lynn Hampton, and great, great granddaughter, Kayla Marie Prince, of Raleigh.

She leaves 3 "step" grandchildren who grew to love her like their own grandmother when Danny married Rose in 1990: Tamara and Eric Carr; children, Kristin and Alex of Raleigh; Kevin and Ashley Nunnery; children, Amy and Josh of Youngsville, NC; and Brian and Michelle Crocker of Plant City, FL. Rose's children considered Ruth as their "Mimaw" since their own grandparents were deceased. She loved the children and grandchildren who entered her life through Danny's marriage just as if they were hers by birth. Ruth was proud to be the "adopted Mimaw" to Kathryn Sawyer, Raleigh. Ruth was "Mimaw" to all of them.

She leaves the four children of her sister, Helen. Nephews Ray Lee Hornbeak and wife, Mary; Preston Hornbeak and wife, Terrie; nieces Joanne Megason and husband, Thomas; Linda McCombs and husband, Steve. She leaves Gladys Ervin, the widow of her brother Joe Hyde Ervin, of Kannapolis. After Joe's death, Gladys continued her relationship with Ruth, a special bond that honored Joe. Ruth leaves many other nieces, nephews, family members and friends who will remember Ruth as a kind, loving and wonderful woman who loved her family beyond measure and always put others first.

ROANOKE HAMFEST

Thanks, Paula!

(an open note from the editor)

On April 8 I received an email from Paula Shutt, who has been taking care of *The SERA Repeater Journal*'s Hamfest Calendar listing for some time. In that message she told me that, due to personal reasons, she will no longer be able to continue as calendar editor.

Of course I was curious about her reason--- as I was just getting into the saddle to get my first issue out, I wondered if she had something that she didn't like about me, personally. So, I sent an email back to her and, in a short correspondance, she assured me that it was just coincidence that she was resigning effective with my first issue.

I'm sorry that I won't get to work with Paula. I know, from experience, that the hamfest listing is one of the top five most influential reasons people join SERA. From what I've seen, Paula has done an outstanding job in what proves to be a less-than-thankless task: not only do you seldom get a "thank you," but if you make an error folks seem to come out of the sky to jump on you with both feet. It's a tough job, but she did it well.

The good news is that she was kind enough to consider helping us out sometime in the future, as time and inclination permit. In the meanwhile, the Hamfest Calendar will be taken care of by some ad hoc volunteers who wish to remain anonymous--- in other words, the column will be edited by some of our fine team of staff reporters.

Hamfest sponsors can continue to send their CONFIRMED DATES to the email address <hamfest@sera.org> and it will be listed in the calendar. Remember, if we don't hear from you, your date (if any) will have a "*" in the listing. Advertisers should still contact the editor.

In the meantime, if you'd like to thank Paula Shutt for her fine work, please send an email to the hamfest email address (<hamfest@sera.org>) and we'll be sure to pass it along. I, as an SERA member, appreciate all the hard work that she has done as a volunteer and look forward to the day that we might have her back. We'll miss you, Paula!

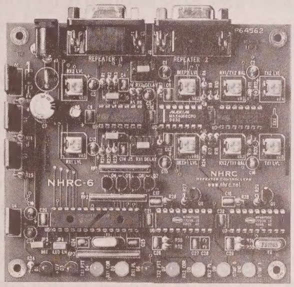
NHRC
REPEATER CONTROLLERS



NHRC-6
Dual Repeater Controller

The NHRC-6 is an advanced, low cost dual repeater controller. It has a highly integrated design, using state-of-the-art components, which results in a powerful controller with a low parts count. This increases reliability and lowers cost.

This controller can be used to control two duplex repeaters, a duplex repeater with a link radio, or to build a bi-directional cross band repeater with simplex radios.

NHRC-6 Features

- Two radio ports that can support the following configurations:
  - two duplex repeaters.
  - duplex repeater with link radio.
  - two back-to-back simplex radios.
- Carrier, Carrier and CTCSS, Carrier or CTCSS and DTMF Access Modes.
- "Intelligent" ID algorithm.
- 55 Control Operator Settings.
- Six User Commands.
- Five saved setups.
- Distinctive Courtesy Tones indicates active receiver ports.
- Dedicated Fan Control Output/Digital Output.
- Touch-Tone remote control and programming.
- Hang timer, ID timer, Timeout timers, Fan Timer, and CW messages stored in non-volatile memory.
- Individual audio gating on each port allows use of non-squelched receiver audio.
- Jumper-selectable receiver deemphasis.
- LED CAS, CTCSS, PTT, and DTMF indicators for each port.
- Connectors for each port to attach optional NHRC-DAD Digital Audio Delays, to fully mute DTMF and help eliminate Squelch Crashes.

NHRC-6 Dual Repeater Controller $219
plus shipping & handling

The FCC Liaison Corner

By

Frank A. Lynch, W4FAL

FCC Enforcement actions with respect to repeaters has been relatively quiet in SERA territory since the beginning of this year. Nationwide, there have been eight enforcement letters sent out concerning repeater operation. Of those eight, two were in Connecticut, four were in California, one in Michigan, and one in Arizona.

As is usually the case, all involved either control operator issues, orders for certain individuals to refrain from using a repeater, or interference complaints from uncoordinated operation.

All repeater owners should be aware of the control operator rules for repeaters. If you're a repeater owner refresh yourself by reading Part 97. Most of us never look at it again after we get our license, but it's good practice to review it from time to time. An excellent way to do this is to volunteer to teach the legal part of a Technician Licensing Class. You'll get a refresher course and the class will benefit as well.

The other big enforcement issue seems to be uncoordinated repeater operation. I often get asked if the FCC requires repeater coordination. The answer is..... no.

The rule that covers these situations is **97.205(c), 47 C.F.R. Section 97.205(c):** *Where the transmissions of a repeater cause harmful interference to another repeater, the two station licensees are equally and fully responsible for resolving the interference UNLESS* (emphasis added) *the operation of one station is recommended by a frequency coordinator and the operation of the other station is not. In that case, the licensee of the non-coordinated repeater has primary responsibility to resolve the interference.*

Thus, if you can operate an uncoordinated repeater without causing interference, you're OK, right? Here's the problem with that line of thought. First, if you don't interact with the frequency coordination body in your area, how are they to know the operational details of your repeater? Coordinators can only do as good a job as they have repeater data to work with.

The FCC has also made it clear to SERA as recently as last month that we are not expected to avoid coordinating a repeater on a given frequency to protect an uncoordinated repeater. To quote Mr. Hollingsworth,

"Without 97.205(c), a few repeater stations who, for whatever reason, just didn't want to be involved in the coordination process could thwart the whole process.

The Commission depends upon the Amateur Service to be mostly self-regulating, and that's why we have 97.205(c) to minimize drain on Commission resources. Frequency coordination of repeater stations is one of the underpinnings of the self-regulating aspect of the Amateur radio Service. Bottom line: A repeater station doesn't HAVE to be coordinated or even apply for coordination, but without coordination it has ***no protection*** *from interference, and in fact has* ***"primary responsibility to resolve the interference"*** *to* ***coordinated*** *repeaters."*

If you're operating an uncoordinated repeater and someone applies for that frequency at a site some distance away, then a coordinator does not have to protect your repeater with respect to approving the applicant's coordination request. While this would not be my first choice of action as a coordinator, if there is no other frequency available to the applicant, I would inform the applicant of that and if he desires to proceed with the coordination knowing that he may have to file a complaint with the FCC, then we would.

At present, SERA has 2839 repeaters in our coordination database covering eight states. Of these, less than 80 are uncoordinated. I do encourage each repeater owner who operates an uncoordinated repeater to consider getting your machine coordinated if at all possible.

Uncoordinated repeaters in our area fall into two categories. Those that can't be coordinated due to technical issues with spacing, ERP, and adjacent channels AND those that coordination has never been applied for. In some cases the latter category can be coordinated. Contact you frequency coordinator for assistance.

If you purchase a repeater from someone else, even if you don't move it or change any technical parameters, it must be coordinated to you. You also need to have a coordination form from SERA showing that the repeater is coordinated to you and not the previous owner. If you move a repeater more than 1500 feet, alter power more than 1 dB (about 25%), or change antenna patterns or height by more than 15 feet, the repeater coordination needs to be updated.

If you have a FCC or regulatory topic you would like to me discuss in a future issue, drop me a line at w4fal@sera.org.

73, Frank A. Lynch W4FAL

It's All Free!

Did you know that SERA assistance in coordination, technical help, or interference information is FREE. We do not charge for any of our services. Our operating expenses are derived solely from voluntary membership of Repeater Owners and users.

In 2002, SERA enters it's 31st year of successful operation and service in the SouthEastern 8-states.

Our volunteers are here for you. If you have any questions about SERA, don't hesitate to call or ask. It's that Simple!

10th Annual

Catawba Valley Hamfest and Computer Fair

Burke County Fair Grounds
Morganton,
North Carolina
Saturday
April 21st, 2007

To all of our attendees, thanks for making our 2006 Hamfest a big success! We hope to see all of you again next year.

Remember to bring all of your friends!

Congratulations to the BIG Winners for 2006:

Grand Prize - Icom IC-746 with Power Supply - Charles Davis, KQ4RN Old Fort, NC
First Prize - Dual Band Mobile - Dana Stranger, KI4OCW, Greer, SC
Second Prize - 2 Meter HT - Roger Grindstaff, KI4FPC, Arden, NC
Early Registration Prize - $100 Hamfest Bucks - Winston Small, KC4LLV, Morganton, NC

- **Put your name here next year! We'll see you on April 21st, 2007!**

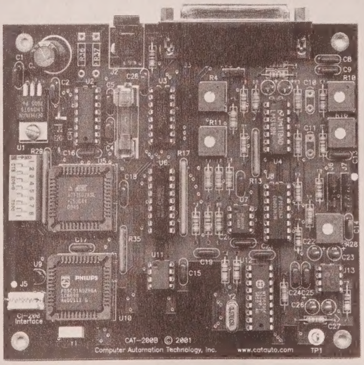
CAT-200 Repeater Controller

This controller was specially developed to provide remote base linking operation and a voice synthesizer at an extremely affordable price.



Features Include:

- *Voice Synthesizer ID*
- *(12) Voice Messages*
- *CW Identifier*
- *Beacon Message*
- *Remote Base Port*
- *DTMF Audio Muting*
- *DTMF Pad Test*
- *(30) Control Functions*
- *(4) Logic Inputs*
- *(4) Output Switches*
- *Optional Peet Weather Station Interface **
- *Optional Windows ® Editor Program **

** Requires CI-200 Computer Interface*

Ordering Information

CAT-200** Controller Board, Wired & Tested* ***$199.00
RME-200L** Rack Mount Enclosure* ***$49.00
CI-200** Computer Interface and Windows Editor* ***$59.00

Tennessee Assistant Director, KG4FZR SK

David Fridley KG4FZR, Tennessee Assistant Director and East Tennessee frequency coordinator for the Southeastern Repeater Association, passed away on February 9th in Thomasville, North Carolina. An electronics technician whose career in RF engineering spanned more than 30 years, Fridley was the owner and operator of Business Cell Systems and AAA Tower. He was climbing one of the 192 towers he owned at the time of his death.

A local newspaper reported Fridley had replaced a light bulb and was climbing down the tower when he fell from a height of approximately 20 feet. His son John, KF4PVQ, was at his side and later reported his father's untimely death may have been caused by a heart attack.

Fridley was a life member and former president of the McMinn County Amateur Radio Club, holding both the Amateur Extra Class license and the First Class Commercial Radiotelephone license.

He owned or co-owned several amateur repeaters in East Tennessee.

Scott Duckworth, NA4IT said through club affiliations Fridley had saved McMinn and Monroe County amateurs thousands of dollars in repeater maintenance costs, and had even provided some of the repeater hardware for club use.

Another club member, Tim Aikens, AJ4D, credits Fridley with “helping to mold the foundations (of local clubs) for future hams to build on.”

Duckworth said even with his extensive background, amateur radio provided a unique fascination from which he derived much enjoyment and satisfaction.

Fridley's career started many years ago at the state vocational school in Athens, imparting his knowledge of the exciting field of electricity / electronics on his students. During the five years he spent there he became the youngest certified teacher for vocational electricity and electronics in Tennessee. He went from there to the engineering staff of Channel 26 in Knoxville, where he performed maintenance on their five million watt UHF transmitter. He later entered private business as owner of two companies offering leased tower space to industry, government and amateur radio concerns in ten states.

Fridley served as an American Radio Relay League Technical Specialist in Tennessee. He enjoyed building and maintaining repeaters and was a strong supporter of his club's participation in Field Day.

He loaned his 160 foot tall mobile crane from which he flew an American flag to mark the location of the Field Day exercise.

Shortly before his death, his home station was featured in QST and can still be viewed on several ham radio websites.

Other friends say the good he accomplished through his work at the church he attended will provide fond memories they will cherish for many years.

Aikens said Fridley was a Christian who had an impact on all around him.

Mike Lavoie, AA1SN, remembers a man with a “friendly attitude” who “saw and said only good things about everyone.”

Fridley was an active member of Fairview Baptist Church where he supported mission work. He managed Eastern Sky Ministries, his family's own organization that contributed funds, vehicles and supplies to missionaries.

Evan Ray, WA4PNI, a close friend, said he would miss “one of the most giving and generous Christian friends I have ever had. We spent many hours driving and working on various tower sites and I will cherish the good times and conversations we had.”

He will be missed by his friends at SERA, who valued his input on coordination issues.

The day of the fatal accident his son and wife, Rita, KI4MJR, who was nearby, accompanied him on the trip to North Carolina. His mother also survives.

--- Bob Gault [bgault@clevelandtn.net]

To the SERA Membership:

Mom and I wish to thank you all for your prayers, thoughts and concerns with Dad's recent home going. The only real comfort I have in this whole situation is the knowledge that dad had accepted the blood of Jesus Christ many years ago and as I have done the same, years ago, I know I will see dad again (just not on this earth).

SERA is an organization which performs a service to the Radio Amateur community for the betterment of the hobby and our communities in which we live. Dad felt honored to have been a part of this select group of people to contribute what he could for the advancement of the SERA and Ham radio. The saying goes something like “He who has many friends is truly rich.” As many of you know, I helped dad in the background and have, through e-mails and phone calls, gotten to know several of you and I consider you my friends.

Any help or assistance which I can offer SERA, I will be more than glad to give; however, as I am trying to figure the rest of my father's business out and get the many affairs in order, my time able to be offered will be small. One day in the future I may ask SERA if I may gain the E-TN coordinator's position; but for now, mom and I need to try to figure out the business and keep it going. I would like to thank you for allowing me to tag along with dad and experience SERA as I have. I will continue to support SERA with the many difficult decisions which have to be made.

In closing, if any of you would like to make a contribution to an organization in dad's memory, our church, Fairview Baptist Church in Athens, TN, is gathering funds together to build a new place of worship as we have out grown our current building. The church's phone number is 423-745-6781. Once again, mom and I wish to thank each of you for your prayers, thoughts and concerns during this trying time.

73,

John Fridley, KF4PVQ

Good Hamfest, Just Fewer Hams...

by Gary Pearce KN4AQ

A view of the fleamarket area at the 2006 RARSfest in Raleigh, NC (Photo credit: KN4AQ)

RARSFest attendance was about 1600 this year, down about 300 from last year. In the 90's, we filled the Jim Graham building to capacity with flea-market tables. Even our wide aisles were crowded. When I announced the Grand Prize at 3:30 PM, a crowd of several hundred mobbed the stage and cheered (or groaned) at the announcement.

This year, we left the back end of the building empty. There was good "buzz" in the space we did fill, and dealers and vendors did good business, but at Grand Prize time, a dozen or so hams watched as I drew the winning ticket. We had hoped to at least hold the line with last year, but when we counted the tickets to pay the Fairground's bill, we faced the music... again.

As you'll see in our ad, we are not committing to the building for next year as of now. The price has shot up, and with revenues down by thousands, the hamfest would be a financial loss next year if we stayed. We've raised prices as much as we think hams will stand. We've cut expenses to the bone, and there's nothing left to cut. So we now begin looking for an affordable home that matches our current size.

Like other hamfests, the RARS-Fest committee hasn't found a formula that will bring hams back to hamfests. We've done things other hamfests don't, like our Homebrew contest, the QLF and QBH CW contests. This year we added a "New Ham Forum" that helped answer questions for the two dozen or so hams who attended it. And we're still looking for other things we can do. But these events, plus the usual forums, are sidelights that appeal to a fairly small segment of the attendees, while most of the hams at the fest continue to mill around the dealer booths and flea market.

Hamfests aren't dead by a long shot. In North Carolina, Shelby, Charlotte, Raleigh, and the many smaller hamfests are filling a need for a good number of hams. Just not what we'd gotten used to in the "glory days" of the mid 90's. Unfortunately, as hamfests slowly get smaller, the cost of the facilities keeps rising. At the NC State Fair Grounds in particular, other events are growing, and the pressure for building space and dates means that the Fairgrounds can command a higher price, and demand that an event utilize (and pay for) the space more fully. Charlotte will be looking for a new home after next year. Shelby, a bigger fish in a smaller pond, rallied the community behind the money they bring to the area to beat back an aggressive Fairgrounds manager, but their expenses will rise, too.

Painful as it is, hamfest committees must adjust to reality and go where they can afford to operate, or shut down as unfortunately several shows do across SERA territory each year.

Is there a "bottom" to the decline? Can hamfest attendance turn around and climb again? Nobody I've talked to knows.

Why is attendance falling, anyway? If you attended fewer hamfests than you used to, then only you know YOUR reason. The most often cited factor is e-Bay, and other on-line trading sites. Perhaps. Buying and selling parts and radios has never been a big reason I go to hamfests, but it might be for you. The unspoken fear is that hamfests are a symptom of a "general decline" in ham radio. That's a subject for a much longer story.

Then there's gas prices, which seem horrible, but might be a little less fearsome if you do the math. Let's plug in some reasonable numbers that make the results easy to see:

- a 200 miles round trip (like Winston-Salem to Raleigh).
- 20 mpg. Your Hummer will do worse. Your Mini-Cooper a little better.
- you're going to use 10 gallons of the new liquid gold.
- at $2/gallon, a price we feared two years ago but now look back on with nostalgia, you would have spent $20 on gas.
- at $3/gallon, about what the stuff's going for today, it's going to be $30 for the trip.
- that's $10 more than it cost two years ago. Not good news, but not the new dark ages, either.
- literally, your mileage may vary.

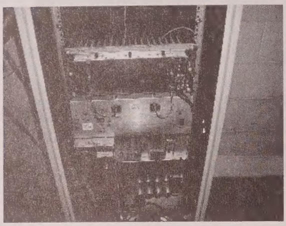
So maybe other stuff that pulls on your time is either more important, or just more fun. If that's so, well, we'll miss you. We ARE missing you. And we're wracking our brains to figure out how to bring you back.

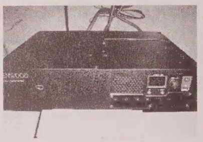
Alexander Amateur Radio Association

The Alexander Amateur Radio Association is located in Alexander County in the beautiful foothills of North Carolina.

Repeater
Cabinet

The Association has recently put up a repeater overlooking the Linney's Mountain in central Taylorsville, with a frequency of 147.195 with a 94.8 tone. This is a SERA coordinated repeater. SERA was very helpful and cooperative in all ways in the process of coordinating the repeater and has our sincere respect and thanks for their help.

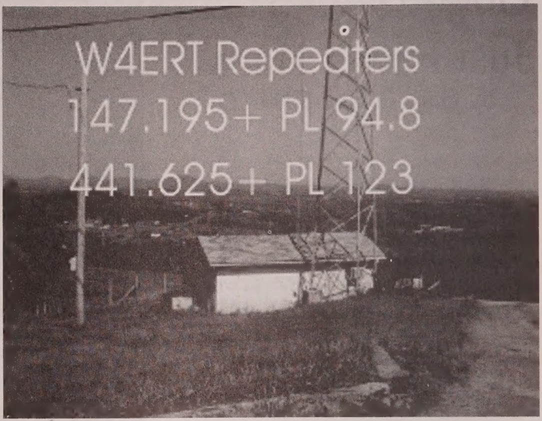




The repeater itself is a Kenwood TKR-750 with an output of about 85 watts. We have a fairly good coverage with an estimated 30 mile range and sometimes exceeding that, depending on weather conditions and elevation of amateurs calling in. We have had amateurs call in from as far as Chesnee SC and Black Mountain NC. on as little as 5 watts.

The Alexander Amateur Association meets at 7pm every third Tuesday of each month at the Alexander County Rescue Squad in Taylorsville. All interested persons are encouraged to attend our meetings. We also have an emergency training net each Sunday night at 9 pm. This is an open repeater and visitors are welcome during the net as well as any other times. We also operate an echolink node of 56135 and link to a geocaching net on Thursday nights at 9:30pm.

ALEXANDER CO.



HI PRO REPEATERS

Hi Pro "R1" Repeater
144 MHz, 222 MHz or 440 MHz
Here is a compact **LOW COST** repeater (less controller) priced at just $699.
A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,179. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

Hi Pro "E" Repeater
144 MHz, 222 MHz or 440 MHz
The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

The Radio Amateur Club of Knoxville
PROUDLY PRESENTS

THE 40th ANNUAL

ARRL SANCTIONED HAMFEST

KNOXVILLE HAMFEST & Electronics Exposition 2006

Saturday June 10, 9 AM to 4 PM

Location: KERBELA TEMPLE
315 Mimosa St, Knoxville, TN

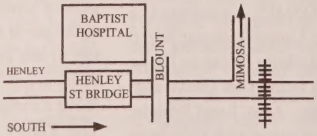
At this location, we will be offering what many have requested for the Knoxville Hamfest:

- ⇒ **OUTSIDE FLEA MARKET!**
- ⇒ **INSIDE DEALERS**
- ⇒ **LOTS OF NEARBY FREE PARKING**
- ⇒ **HOME COOKED BREAKFAST & LUNCH**
- ⇒ **TALK-IN ON 147.30, 224.50 AND 444.575**
- ⇒ **UPDATES AT HTTP://www.w4bbb.org**

General Hamfest Information, contact:
Ashley Ferguson (KI4FYA),
Public Information Officer
E-mail: ki4fya@yahoo.com
(865)-579-4568

Inside Tables only, contact:
David Waters (AC4JF)
E-mail: dpw@esper.com

NOTE: Mimosa Avenue is one block south of Blount Ave at the south end of the Henley Street Bridge. IF YOU PASS THE RAILROAD TRACKS, YOU WENT TOO FAR!



MISSISSIPPI

REPORTED BY
CHARLES DIAMOND
43 JUDE BREWER RD
LUMBERTON, MS 39455
(601) 796-9279
K5ASL@SERA.ORG

Greetings Mississippi!

Well it has been super busy around here and well I guess everywhere. We have had a lot going on in Mississippi, so I may miss some of you folk's news because I did not get any information about it before now.

I know that the Tupelo Amateur Radio Club had their Papa Jack Trade Day, however I have not received any news on that event other than that it took place on April 8.

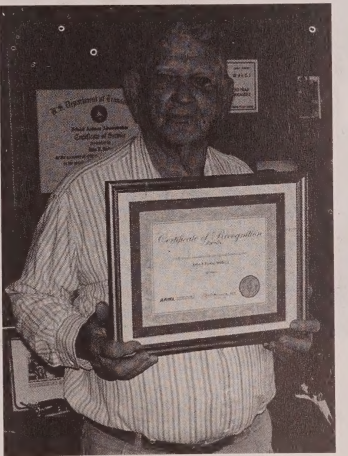
HARC Provides Communications for Walk America

The Hattiesburg Amateur Radio Club provided communications support for the March of Dimes Walk America event in Hatties-burg on April 2. Nine operators provided safety and logistical communications along the walk route, which began at Kamper Park and followed parts of Mamie, Concart, and Adeline Streets south of Hardy Street. Lex Mason KD5XG, set up near event headquarters inside the park, and the others were deployed to strategic locations throughout the neighborhood. Participating were John Porter, W4KGJ; Steve Noons, N6OJN; Toxey Morris, W5TMM; Brad Amacker, N5MZ; Leon Pringle, W5NA; Chris Lamousin, KD5AXK; James Lee, KC5TYL, and Mike Purvis WZ5Y.

New Classes in the Pine Belt.

Two new radio classes have started in South Mississippi for prospective hams. Aaron Blalock, KD5MIS, is teaching one with help from the Lamar Amateur Radio Club and the Hattiesburg Amateur Radio Club at his church in the Oak Grove area on Thursday nights. Also, Leon Pringle, W5NA, is teaching some with help from the Hattiesburg Amateur Radio Club at Forrest General Hospital. Hopefully, both of these groups will produce some new hams for our area and new SERA members as well.

Old Ham Marks Incredible Milestone.



Jon Porter, W4KGJ, recently started his sixtieth year as a member of the American Radio Relay League. The ARRL sent Mr. Jon a certificate to mark this event. He assures us he will be around to get the 100th cause someone needs to keep us straight.

Packet in Mississippi.

Due to Katrina a few of us have decided to start up packet again. We started off with me not knowing much about it and others knowing some. So far we are running a digi-peater close to Hattiesburg on 145.010. We are looking for help and more participants so anyone interested in getting some more links on the air please email me at the contact information at the top of the article. If you already have a TNC setup, look for us on 145.010 and leave a message on any of the mailboxes. The Lamar County Emergency Operations Center got me interested in getting it going and so far I am not disappointed.

MS EMA and FEMA announcement.

The following is from the ARRL letter and is passed on because of its importance.

Effective October 1, 2006 several states are now requiring that emergency responders working in state and/or county EOCs as well as field operations complete selected FEMA Emergency Management Institute courses. These courses are: the Incident Command System (IS-100/IS-200); the National Incident Management System (IS-700); and the National Response Plan (IS-800). IS-100 and IS-700 are required for workers and, in addition, IS-200 and IS-800 for supervisors (EC/DEC). MEMA now only recommends that these courses be taken, but this could change in a second because course requirements are tied into the federal funding that an agency receives. The four courses are available on line at no cost at www.training.fema.gov/EMIWEB/IS/. Click on 'Our Courses.' Each course takes about two hours to complete including taking and submitting the exam. If emergency responders have not taken the appropriate courses they could be restricted at some point in the future from participating in MEMA/local EMA operations. Be Prepared!

Finally I would like to ask again for folks to send me anything they would like to see put in the SERA Journal. I have enjoyed writing these articles and would love to have more of your newsletters and other pictures etc. that you folks find interesting. Hope to have more later.

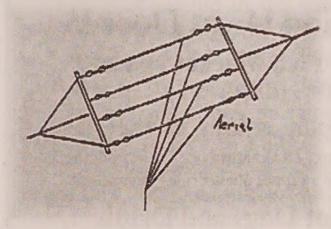
Nostalgic Wavelengths

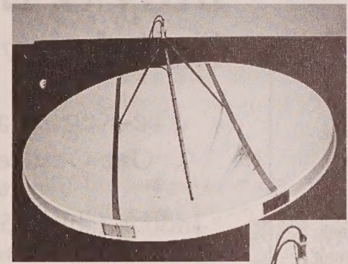
DAVID BOWER, K4PZT
P.O. BOX 10145
KNOXVILLE, TN
37939

In the early years of this new century we are sometimes reminded as amateurs that antennas are one of the few remaining items we can still construct economically for our station. True, some still build their own transceivers using the latest IC's and surface mounted technology. But construction technology is often very complicated and beyond the means of many hobbyists. Further, the cost of building the equipment frequently exceeds the price of similar commercially built units. Antennas remain, in a way, one of the most intriguing and practical accessories that can be constructed for your station. A ham station antenna can be nothing but a long wire antenna of random length and still perform a useful function. A refinement would involve cutting the wire antenna to the proper length for the desired band. A further improvement would be to build a dipole antenna. An extended variation of the simple wire antenna can be expanded further as a Yagi, cubical quad, delta loop or some other variation. In the early 1900s, simple wire antennas (know as "aerials" back then) served the experimenter well for both transmitting and receiving.

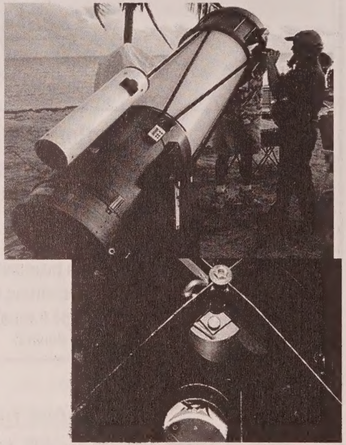


As the higher UHF frequencies were approached, the parabolic antenna became a viable solution for achieving very good gain, with the ability to carefully aim the signal in a very precise direction. It would seem that the parabolic antenna is a relatively new means for receiving electromagnetic signals as evidenced by the large dishes used by NASA and other government agencies. Some may think this type of antenna is complex to build and understand. Both these statements are not true when we dig a little deeper into the parabolic antenna and its history.

In the year 1610 Galileo directed the first primitive telescope at the heavens to capture celestial images and to magnify them. He soon discovered the wonders of a universe hidden from sight by the limitations of the small aperture of the human eye. This first technology for "optical" manipulation of the visible spectrum used glass surfaces to gather more light and refract the image as a focused beam for the eye to perceive. Several years later the first "reflecting" telescopes, made famous by Isaac Newton and others, were used to achieve the same result using a spherical surface to gather and focus light rays. A defect with a spherical mirror is its inability to focus all rays at the same focal point. A refinement, using a parabolic mirror, permits the optical mirror to bring all light rays to the same focal point, resulting in a clearer image. So, in a way, the first practical antennas were really used in the form of telescopes at optical frequencies.



It would be many years before RF electromagnetic technology would take advantage of the same principle using parabolic antennas in the electromagnetic spectrum. Parabolic antennas are not practical for HF frequencies because the size of the antenna structure would need to be extremely large to accommodate the much lower frequencies. At higher UHF frequencies the Yagi antenna becomes impractical because the individual element lengths become extremely short, requiring phased arrays to achieve a practical "capture area" for the RF electromagnetic energy. Capture area, just as for optical telescopes, is an important factor in collecting electromagnetic energy in the RF spectrum. The parabolic shape has an interesting property that applies for both optical and RF applications. A true parabolic antenna has the same focal point for both RF and optical frequencies. True, the precision (or tolerance of the parabolic antenna) is more critical as the frequency increases. But the focal point remains the same. There is another useful property of the parabolic antenna. As the frequency increases, the gain of the antenna also increases for the same aperture (antenna diameter). For instance, a 10 foot antenna at 14 GHz has more gain than at 6 GHz. An example is the relatively small size of HIGHER frequency Ku band antennas used for direct satellite home reception compared to the much larger size antennas used for older, LOWER frequency C-Band satellite reception.



So, as you can see, the parabolic antenna has a long (and ancient) history as an efficient collector of electromagnetic energy. And, it has been proved to be Y2K compliant !!

We appreicate your support
last year. Come join us in 2006

SALISBURY (NC) FIRECRACKER HAMFEST

July 8, 2006 8:00 AM 'til . . .

Salisbury Civic Center

Directions:

From I-85, take exit 76 (Salisbury).
Turn right at ramp intersection
on East Innes Street,
Then Left on S. Boundary Street
(Capt D's/McDonalds Intersection).
2 Blocks on Left to Convention Center.
Talk-in 146.73 (94.8 tone)
(backup: 146.52 simplex)

Pre-Registration $4 - at Door $5

One Outdoor Flea Market space:
Free with Admission

Indoor tables: $5 each as long as they last.
(Dealer setup 3 to 8 PM Friday and 7AM Saturday. Dealers buying 3 or more tables will be the club's supper guest Friday after setup)

Free Coffee – 2 Hot Dogs and Drink $1.50

Walk-in Exams by
W4VEC VEC volunteers - 10:00 AM

Auction - 1:00 PM

For Hamfest info:

Mail: Rowan ARS, PO Box 593, Salisbury, NC 28145

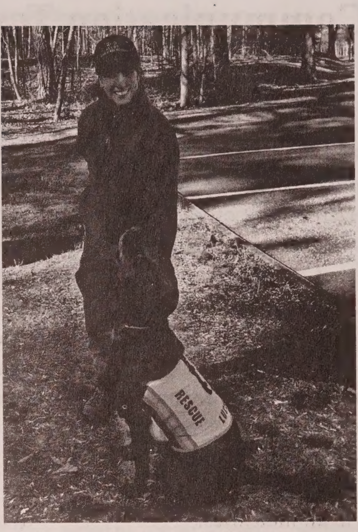
K9 Alert:
Fully Licensed Canine Team

Fred Weaver KG4BKI



Helene Dodge KG4NBD and Luce della Luna at the SARexercise at Petersburg National Battlefield.

Dwight McAtee, K4DUE, President of K9 Alert Search and Rescue Dogs, Inc., invited me to observe and participate in a mock search at the Petersburg National Battlefield. K9 Alert was formed in 1989 to provide Search and Rescue (SAR) dog resources in central Virginia. They operate as a state resource with a Memorandum of Understanding (MOU) with the Virginia Department of Emergency Management.

K9 Alert has the distinction that all the operational members are licensed Amateurs. Dwight described the communications problems encountered in the rescue effort surrounding the touch down of a tornado and destruction of a Wal-Mart in Petersburg. During the rescue operations, on some State Frequency Radios, some frequencies were crowded, and some frequencies were available and under-utilized. The hand-helds in use were not easily reprogrammed to available frequencies.

Following that experience, K9 Alert required all operational handlers to become licensed radio amateurs. This capability serves the team en route and on the scene. They use the flexibility of Amateur Radio to use repeaters when available, to use their mobile rigs for cross-band repeat, or just work simplex. They are working to develop their APRS capability.

K9 Alert uses local Amateur volunteers when on site. Volunteers provide on-scene transport as well as logistical and communications support.

All SAR personnel, both professional and volunteer, are trained in short term survival, land navigation, orienteering, first aid, radio procedures, and ICS. At the mock search, the training showed. From the hat to the shoes, searchers were prepared. All searchers going out must be prepared to survive for 24 hours with what they carry.

The mock search brought together eleven separate SAR groups. All the procedures followed the Incident Command System (ICS) protocols. The Incident Commander briefed the teams on the scenario and assigned the teams to their separate search areas.

When each team completed the assigned search, they returned to base. The team leader was carefully de-briefed. When the team was rested, fed, and re-fitted they reported for the next assignment. Everything was well organized, orderly, and paced to maximize the effectiveness of the searchers.

In addition to their personal preparation, K9 Alert handlers must take care of their dog too! The dogs are air scent search dogs. They are usually employed for wilderness work. Finding lost children and wandering Alzheimer's patients are their most frequent missions. The dogs do not track. They are trained to find the scent of a human in the air and they are effective even when a track is obliterated. Dwight told me that it typically takes two years to train a dog to meet the established certification standards. Some of the dogs are also certified for 'water recovery' and 'cadaver'. More training and qualification is required for those certifications.

I want to thank Dwight for a genuine lesson in humility. Any commitment to public service I might have pretended to pales in comparison to the commitment of the members of K9 Alert. The dog/handler teams can be called out at any time, day or night. They may have to search through a wilderness area at night. Appropriate physical fitness is required. If they get lost, they need to be able to survive and feed the dog. Their pack includes a serious snake bite kit.

I'll be thinking about that the next time I want to whine about my long service in an air conditioned EOC.

For more information visit the team's website at
www.k9alert.org

SOUTHEASTERN REPEATER ASSOCIATION
THIRTY-FIFTH 35 ANNIVERSARY

Communication Tower Regulations in North Carolina

By Frank A. Lynch, W4FAL

The nation's first workplace safety rules on communications towers are now in effect in North Carolina. The North Carolina Department of Labor proposed new safety rules to the Rules Review Commission. Those rules became effective last year on May 1, 2005.

North Carolina is the first state to address communications tower safety for an industry that has a worker fatality rate more than 30 times the average of workers in all industries.

Since 1997, more than a dozen workers have died as a result of falls from communication towers.

What are these safety rules and how do they affect amateur radio operators? I spoke with Jack Forshey Standards Supervisor at NCDOL and one of the authors of 13 NCAC 07F Communications Tower Standards. First we talked about the safety rules themselves. The safety rules may be downloaded from: http://www.nclabor.com/osha/etta/state_specific_rules/7f06.pdf

Section .0601 defines the scope and application of the rules. The rules in this Section contain requirements for policies, procedures, and safe work practices to protect employees throughout North Carolina from the hazards of working on communication towers during construction, alteration, repair, operation, inspection, and maintenance activities. (b) A communications tower is defined as any tower over six feet in height that is used primarily as an antenna or to host one or more antennas.

Section .0602 contains 16 definitions of terms used throughout the rules.

Section .0603 lists Employer Responsibilities. These basically require employers to adhere to rules for acceptable conditions under which to climb, requires that at least two people be on site when employees are exposed to fall hazards of more than six feet, and requires that a competent person visually inspect the tower before climbing.

Section .0604 deals with frequency and documentation requirements for hazards, proposed work procedures, identification of weather conditions at tower sites.

Section .0605 deals with fall protection systems, emergency, rescue procedures, and First Aid/CPR Training and supplies at tower sites.

Section .0607 deals with hoists and gin pole requirements.

Section .0608 deals with training records, medical records, Non-Ionizing Radiation Exposure records, and Equipment inspection records.

Section .0609 deals with training requirements.

I suggest you go and download the document and read it. Most of the items there are procedures that we all should be doing whether we're climbing professionally or doing amateur work. A climbing accident doesn't discriminate between one doing work on an amateur tower and a commercial tower.

So how does this rule affect amateurs? Let's look at some typical situations involving towers and amateur radio operators.

A Residential Tower

John has a tower in his back yard. Jack and Bill, two of John's friends come over and help John install an antenna on the tower. Is there anything John as the tower owner or Jack and Bill as helpers have to do to comply with this rule. Answer: No

The reason is that as long as there is no employee-employer relationship between the parties, none of this applies. If John had hired Jim's Tower service to do the work and Bob worked for Jim's tower service, then Jim's tower service would have to comply with these rules because of the occupational relationship.

A Commercial Tower

What about the case where a commercial tower owner gives a group of hams permission to put a repeater antenna on a tower? As long as there is no employee-employer relationship, none of these rules apply.

However as most repeater owners reading this already know, it's uncommon today for commercial tower owners to allow amateurs to do antenna and transmission line installation. They want the tower rigging to be bonded and have liability insurance to protect them and their equipment in the event of an accident. Most want commercial tower riggers, and they of course do fall under these requirements.

I think that while the amateur community is for the most part not affected by these rules, they should cause us to reflect upon just how dangerous tower climbing can be if one doesn't strictly follow all safety procedures. It only takes one mistake for someone to get injured or killed.

All of us mourned to loss of David Fridley, the East Tennessee Coordinator in February 2006. David died after falling less than 30 feet. Whether there might have been some medical reason for him falling or not we'll never know. However a 100% fall restraint system such as described in the above rules, might have saved his life.

David's death was not the reason I wrote this article. I had been planning to do an article on this topic since last year. However, if it gives you pause to think about your next tower job from a safety point of view, then I've accomplished my task.

Enjoy amateur radio and climb safe. 73, Frank W4FAL

"Stake" K4WC

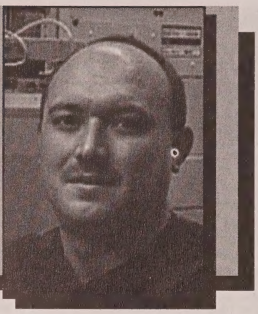
Congratulations to Alpheus H. "Stake" Stakely, K4WC, on being an ARRL member for 70 years. Stake joined ARRL when he was 16. Stake was one of the first meteorologist in the Atlanta, Georgia area. Congratulations, Stake, on 70 years as a ARRL member being one of the first Spark Gap Guys.

Paul Robinette, KD4OZI,
and Lane Kendall, KS4PG

Get the Hammer

And let's get technical

Randy McKenzie
KK4EJ
3661 Airport Rd.
Hillesville, VA 24343
kk4ej@sera.org



Hello all:

A few years ago when I was first asked to write for the RJ, I was nervous and not really sure about what to include. The last RJ, my article focused on the personal side of my experiences with the Mississippi trip. I was very honored to receive several comments from you about it. Two hand written letters arrived and I appreciate all the responses. A special hello to David, KB5DZJ, and Brice, K0CSJ. I thank you for the letters and kind comments.

Working in communications full time for VSP and two part time consulting positions has the spare time limited. When I walk in the house, the last thing I want to see is a radio! BUT, lately as I've been traveling thru the day, I've found the 2 meter and 440 back on, scanning along the local machines, as well as a few nice QSO's with old friends. Forgive me for not being as active as I should be. I think some of you that also work COMM understand.

Old friends, making new friends, and enjoying a ride down the road. Meeting these folks, sharing time with them, and learning from each other. All create a very unique feature of the hobby. One of my favorite QSO's was with Frank Strough (SK). Frank and I would chat on a regular schedule, many times as part of the morning group, and have fun all the way. He talked about wanting an antenna mounted on his car. We discussed what he wanted and when I could come by and take care of it. The QSO's carried along and, by the time I arrived to his house, he was very concerned about his car. My comments about drilling a 3/4" hole in the top, just look for a nice spot and drill, no need to measure. If the whip isn't centered, then we can just bend the whip, or even just try drilling again.

I of course measured for the center, made sure the roof was clear, and popped in the hole, mount and antenna in short time. All the time my mouth engaged in " oh no", "oops", " uh Frank, it might leak", and finally " Frank, might be time for a new car, now its dripping oil" Frank watched for a few minutes, then just went back inside shaking his head.

The job completed, Frank, his wife and myself enjoyed a nice dinner together. The antenna worked great for Frank for many years. Good friends are cherished!

The point of writing about my good friend Frank is to remind myself, and maybe you too, to take time and enjoy that QSO. Good friendships are just as important to our hobby as the radio. My mornings for several years started with a QSO round table with N4VL, KK4X, KK4EJ, and many others. Harry, KK4X an Frank, KK4EJ are now sadly SK. Both great friends and still missed by many.

And yes, to the observer, Frank's old call is now my call. He and I talked many times about his call, and my old clumsy call of KB4YFV. I admired his call, and give "OUR" call now, always remembering a good friend.

Next time your riding down the road and hear a new call on the repeater, take a minute and say hello. It might just be a new best friend you didn't know you had!

If you pass my white truck, wave, I'll try to have the rig on! 'till next time, GOD bless!

THE SERA OFFICIAL REPEATER INDEX

REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2006 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The *codes* column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

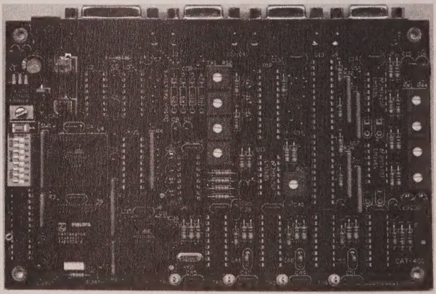
CAT-400 Repeater Controller

This controller combines the features of the popular CAT-250 controller and the RLS-1000 Remote Link Switch into a four- port controller ideally suited for sophisticated linking systems.

Features Include:

- *Voice Synthesizer ID*
- *(20) Voice Messages*
- *(1) Repeater Port*
- *(3) Remote Base Ports*
- *(4) DTMF Decoders*
- *CW Identifier*
- *DTMF Audio Muting*
- *DTMF Pad Test*
- *(40) User Macros*
- *(50) Event Macros*
- *(64) Control Functions*
- *(4) Logic Inputs*
- *(4) Output Switches*
- *Internet Firmware Upgrades*
- Optional Windows® Editor



Ordering Information

CAT-400** Controller Board, Wired & Tested **$399.00
RME-200L** Rack Mount Enclosure **$49.00
ED-400** Windows® Editor **$49.00

Spring has sprung and summer is on the way. I am still getting acquainted with various members of SERA around the state. **If you would like to share news with other repeater owners and journal subscribers please consider adding me to your email list and keep the club newsletters coming.**

CLUB NEWS:

Alford Memorial Club, W4BOC

Larry Dodd, K4LED, was named 2005 Ham of the Year. Larry is always helping, whether it is for the radio club or school children or the general public with his 101Science.com website. Larry is always finding a way to quietly help others. Thank you Larry for all you have done for the club this past year and congratulations. Larry received his plaque at the February Meeting.

Atlanta Radio Club, W4DOC

The Atlanta Hamfest is in its 78th year and will be held on June 3rd. The event will take place at Jim Miller Park in Cobb Co. If you're looking for a great tailgating experience as well as a fine group of commercial vendors, make plans to attend. More info can be found at www.atlantahamfest.com. The club meets the first Thursday of the month at The Red Cross HQ on Monroe Dr.

Gwinnett ARS, W4GR

CALLING ALL KIDS!! CALLING ALL KIDS!!! Venture Crew 73, a co-ed Scouting group, for kids between the ages of 14 to 21 with an interest in High Adventure and Amateur Radio is looking for some new members. Maybe YOU, or someone you know?? This is a fabulous group of young people, with dedicated leaders, that is sponsored by the Gwinnett ARS. We've had the privilege of watching some great kids grow and mature into fine young men and women. This is such a fun organization that, when the kids who've been members turn 21, they don't want to leave! (Some of them end up being adult leaders so they can continue to enjoy the fun).

Think this sounds like a good fit for you or someone you know?? The following information comes to us from STEVE BACK, WB2OGY: A Boy Scout Venture Crew is a scouting opportunity for boys and girls ages 14 to 21. GARS holds a charter from the Northeast Georgia Council of the Boy Scouts of America for Venture Crew 73. The basic purpose of the crew is to encourage youth to learn about Amateur Radio while enjoying the adventure opportunities offered by scouting. These opportunities include access to scout camps, their facilities and the Council's high adventure instruction. As with traditional scouting units, the venture crew is also encouraged to take seriously its duty to God and the community. Scouting and Amateur Radio have a long history of working together and teaching the youth of America. A large number of GARS members are active in Scouting. Just over five years ago Carter Wood AG4LK decided it would be nice to lower the average age of GARS members to an age under 50 years. That thought brought about the birth of Crew 73. The Crew now has about 12 active youth members and over half of the youth are now licensed. The Crew is youth run but a small group of adult leaders ensures the activities are appropriate, safe and meet the guidelines of the Boy Scouts of America.

Crew activities usually mix high adventure and the use of amateur radio. A typical outing may involve camping, horseback riding and setting up a portable HF station at the campsite. The crew has shown an interest in horseback riding, climbing, hiking and shooting spots. Members of Crew 73 finished 3rd in a South East Regional Archery Competition. The crew has also helped with GARS activities such as Field Day and won 2nd place in a competition for display exhibits.

As some of our crew approach the end of youth (age 21), the crew is looking for new members. If anyone knows of young people who would enjoy the Crew's activities please have them attend one of the crew meetings held the first Tuesday of each month. See the Crew website at http://www.gars.org/crew73 for details. An interest in Amateur Radio is not necessary but while having fun with other activities an interest may develop. As members of GARS it is our responsibility to encourage the future of our radio service and the future of our country. Encouraging youth to join Crew 73 will help ensure a better future.

South Georgia ARC, W4PVW

Congratulations to KG4TWJ---Kenny Freeman received first place in the Indiana QSO PARTY.

Thomasville ARC, W4UCJ

On March 1, 2006, a number of representatives from 13 South Georgia and North Florida counties met in Thomasville for a conference to discuss how emergencies that involved crossing the "imaginary" state line would be handled. In attendance at the conference were Thomasville ARC President Mike Brown, KE4FGF, representatives from Law Enforcement, Fire Services, Hospital and Allied Health Organizations, Volunteer Organizations (principally Red Cross), and both State and Local Emergency Management Officials. This meeting, called "Crossing the Imaginary Line," was to allow everyone to get to know each other better, learn more about each others agencies, and begin work on ways to better coordinate events that would ultimately bind us all together.

VOLUNTEERS NEEDED

Steve Garrison, N4SEG, will be coordinating the communications efforts again this year for the Summer Special Olympics GA, to be held June 2-4, in Atlanta. He's already in the recruiting mode, so if you can help, please send him a note at n4seg@arrl.net.

AMATEUR RADIO CRUISE TO THE CARIBBEAN

For those of you looking for a little rare DX, actually you would be the rare DX, a cruise has been organized by a Virginia Beach Ham, Vernon Fix, W4THN. I thought I would pass it along for those of us in the Georgia area. Ham activities will abound during the cruise from beginning to end. Seminars for DX, Antennas and other technical topics too. Bob, K4UEE, or one of the Peter 1 hams, will be on hand to cover the 3UOX Peter 1

"DXperience". The schedule inlcudes an Antenna Forum. Mike, K3MI, has volunteered to head it up, he is a retired Northrup-Gruman Antenna Engineer. Check for more details at www.hamradiocruise2006.com. There are special booking considerations involved. The cruise is scheduled for December 3 - 10, 2006 out of Fort Lauderdale, FL. Enjoy!

NEW GEORGIA REPEATERS

Here are a few of the recently coordinated repeaters in Georgia.

City	Call	Freq	Tone
Ellijay	K4LDI	145.1700	100
Parrot	WG4JOE	441.600	none
Morrow	W2XAB	1292.1000	100
Athens	N4ZRA	442.900	179.9

It's All Free!

Did you know that SERA assistance in coordination, technical help, or interference information is FREE. We do not charge for any of our services. Our operating expenses are derived solely from voluntary membership of Repeater Owners and users.

In 2006, SERA enters it's 35th year of successful operation and service in the SouthEastern 8-states.

Our volunteers are here for you. If you have any questions about SERA, don't hesitate to call or ask. It's that Simple!

KENTUCKY

REPORTED BY
PAT SPENCER KD4PWL
3395 SPANGLER #26
LEXINGTON, KY 40517
859-948-1320

We have enjoyed a particularly mild winter this year in Kentucky. Warm spring temperatures are reawaking amateur radio activities in the Commonwealth.

Eastern Kentucky is alive with activity our old friend and former columnist Fred Jones, WA4SWF reports. "In the Big Sandy Valley our repeaters are in for a big change." The plans are in the works by Paul Delong, KF4LNB; John Hager, N4KJU, and Ed Caudill, KB4SQI to coordinate linking repeaters in Ashland, Grayson, Louisa, Paintsville and Saylersville using UHF radios. "This will give us some very needed coverage during emergencies in Eastern KY and into a few border area counties of West Virginia," Jones added.

Emergency communication efforts are expanding as well. According to Jones, "We have at this time Paintsville, Louisa and Prestonsburg with amateur radio stations set up in the hospitals. Also in the Lawrence County Health Department." Volunteers and licensed members of the staffs of these facilities can utilize the radios during drills and emergency activations. Community Homeland Security planning efforts are to add more facilities are in the works. "Most of these places have the State Satellite Telephone System installed," according to Jones.

Finally, congratulations to the operators in Paintsville who have started a new amateur radio club! Jones shared with us that Hager was chosen as president and they "Have done a lot of 2M repeater work in Paintsville and will have it on the air soon." If you would like information on this new club, contact Hager at n4kju@arrl.net. Jones promised to keep us posted on developments on these and other ham radio happenings.

Central Kentucky has seen many public service events for amateur radio operators. The reality of publishing has me submitting this column before they occur, and you reading it after they have taken place. As such, I will provide a summary of the events in our August Repeater Journal. Events from late May to July include the High Hope Steeplechase, Mutt Strut, America's Walk for Diabetes, and Rails to Trails. If you are interested in helping, please contact Tom Mansfield, KG4TND at kg4tnd@arrl.net or visit fcares.kyham.net.

The Kentucky District 7 Amateur Radio Emergency Team (KD7ARET) has received a donation of $5,000 from John E. & Betty J. Meyer and Family Foundation on March 20th to help support their efforts in providing emergency communications to served agencies in times of manmade, natural or chemical disasters. The agencies most served by the organization are police, fire, National Weather Service and Emergency Management. They also have received two cash donations so far this year, one from Carol Hughes for $500 and the other from Cinergy for $1,000. St. Elizabeth's north and south units along with St. Luke east and west are in the process of donating radios, antennas, power supplies and coax to be used in times of emergency by KD7ARET.

KD7ARET is comprised of over 100 men and women, Amateur Radio Operators (hams), living in the nine county areas in District 7 of Northern Kentucky; which include Boone, Campbell, Carroll, Gallatin, Grant, Kenton, Owen, Pendleton and Scott.

Some of the monies will go for communications training in HAZMAT and search and rescue. We will be participating in the American Radio Relay League National Field Day exercise on June 24th and 25th at Pendleton County Emergency Operation Center. This is open to the public and is an exercise in sharpening our communications skills by making contact with other stations around the world. This exercise will be open to the public.

John Meyers, NB4K, Kentucky ARRL Section Manger released information for those seeking to achieve the Worked All States (WAS) Award. The card checkers in Kentucky are Larry Brumett, KN4IV; Don Meredith, N4THE; Warren Moore, NM3U; Phillip Carruthers, AE4GH; Buddy Sohl, KC4WQ; Paul Smith, ND4X, and Kenneth Bickel, AC4VV.

Emergency communications in Western Kentucky were put through their paces on March 1st and 2nd reports Ron Dodson, KA4MAP, Kentucky Section Emergency Coordinator. "The KY Office of Homeland Security, KY Army National Guard, KY Division of Emergency Management, KY State Police and many other agencies joined forces with a Muhlenberg County mining company and local officials and the KY Air Wing of the Civil Air Patrol to conduct an Earthquake Exercise at the Wendell Ford Regional Training Center (WFRTC) near Central City in what we refer to as Area 2 of the state. This exercise was based upon a 6.5 R Magnitude earthquake along the Wabash Valley Fault System in Southern Indiana and included a mine collapse scenario similar to the real event in Sago, WV early in 2006. As a part of the exercise, KY Division of Emergency Management tested the new Mobile Command Vehicle (MCV)."

The MCV is equipped with the latest technology available including amateur radio capability. Dodson reports on the communications environment, "Once you go into the rear, the workstations on the passenger side of the MCV are dedicated to amateur radio and interoperability with all bands represented that one might need in an emergency. The interoperability rack features an ACU 1000 interoperability interface and six radios on the numerous public safety bands. A rack charger mounted at floor level keeps one dozen hand held radios fully charged and ready to go. Here, the transceivers for the 2 MSV satellite radios also reside. Just to the right of all this, two Kenwood TS-570S units along with three Kenwood 2m/70cm dual-bander's are permanently mounted and have headphones for operator comfort. The MCV also carries a Kenwood TS 2000 in a pack configuration, which can either be deployed alone or used as a part of the MCV radio compliment. Antennas are interchanged as needed via a panel to the upper left of the amateur radio stations on which each antenna for all bands is marked as is each mounted radio above its location. Antenna change is as easy as matching the cables on the switchboard marked for the radio you want with the antenna connection you want. Winlink 2000 is on board and was used extensively during the exercise. HF voice on 40 meters was not possible with the state EOC and so a quick connect through a station in Florida on 7.067 MHZ. allowed us to pass traffic via Winlink back to the state EOC probably faster than we could have done otherwise."

Want your repeater system covered? Is your amateur radio organization doing something that should be publicized? If so, please share the information with the readers of the Repeater Journal. Contact me at the email address under my photo. Kentucky is a large geographical area, and it is difficult to know what is going on unless I hear from you.

If you are new to amateur radio in Kentucky and are looking for resources, take a moment to check out the KYHAM Web Site at www.kyham.net .

FUQUAY-VARINA, NC 27526
WA4KE@SERA.ORG

I had a chance to attend the Charlotte Hamfest. An excellent hamfest, even though the vendor participation was down. I noted that ICOM was absent and the flea market was sparser than previous years. Several more hamfests are scheduled for this spring and summer heading toward conclusion in Benson, scheduled for mid-November. Make sure you visit your local fest to show your support for your local club and vendors that attend these fests.

The Raleigh ARS has a new webmaster, James Worley, KB4HDQ, and the club is looking for a new newsletter editor. This is a great opportunity for someone to offer their time and experience to a great cause. Also, the recent edition of their newsletter offered a reminder about public service and amateur radio. Check out the NC ARES webpage or Carolina Helping Hams webpage for more information.

W4NC sponsored the NC QSO Party again this year. Last reports indicate a great participation, even exceeding last year's returns. This contest offers some interesting intrastate rivalries and I am ready to see the results.

The Randolph ARC assisted four Boy Scouts with their radio merit badges. Three other scouts completed partial requirements for their involvement. This activity is an excellent method to get new interest into ham radio.

The Shelby Hamfest is planned for the Fairgrounds. Last year the hamfest had to fight the high gas prices, and the year before, the club had to fight to retain their fairground location and this year it appears the rental fee has crept up. Be sure to attend this hamfest, currently scheduled around Labor Day weekend.

The Orange County Radio Amateurs (OCRA) donated some amateur radio books to the Orange County Public Library in memory of Nick Waters, who was director of Orange County Emergency Management. (Photo p.59)

Rockingham County Amateur Radio Club will be hosting their 2nd annual Hamfest & Computer Show on May 13, 2006 from 8:00AM to 3:00PM at the Liberty Baptist Church located just off Hwy 14 between Eden and Reidsville.
GARA newsletter offered an open invitation to all licensed hams to come out to the Natural Science Center of Greensboro to operate station KF4RBN anytime the Center is open. KF4RBN was built by Ryan Bradley, KD4TMD, as his Eagle Scout project in 1997.

Greensboro Amateur Radio Association had Steve Marks, KE4FCW, Assistant Coordinator of Guilford County

Emergency Management. He spoke on the amateur radio operator's role during an emergency. Steve stressed the need for coordination of communication during emergencies, and the need for amateurs to be familiar with the Incident Command System. (This course is given several times a year at local fire departments and EMS centers. In addition, FEMA has an on-line course pertaining to this subject. http://training.fema.gov/EMIWeb/)

Be sure to read John Covington's monthly newsletter. This month's newsletter centers around emergency operations and upcoming requirements. The Department of Homeland Security is requiring all first responders, including volunteers, to complete training in the National Incident Management System (NIMS) by 2007. This action is needed to ensure comments stated by an Emergency Response Coordinator in Mississippi who stated that "he didn't want "a bunch of yahoos with walkie talkies" running around, getting in his way", are few and far between.

The Brightleaf ARC web site has been moved to http://www.w4amc.com/. The Brightleaf Amateur Radio Club will have its next meeting on Tuesday, May 9, at VFW Post Home 7032 on 1108 Mumford Road in Greenville.

The first group listed are existing repeaters that either changed ownership, location, or had technical changes requiring re-coordination.(18)

Will Harper, K4IWW is stepping down at the end of March after 20 years as Net Manager of the Carolinas Net (3573 kHz, 7 PM and 10 PM daily). His replacement has not yet been determined.

Forsyth County ARES Net Thursday evenings at 8:30 p.m. on theW4NC repeater, frequency 145.47 Mhz.

AC4RC will operate in the Amateur Radio Lighthouse Society's Lighthouse Spring Lites QSO Party on April 15th through April 23rd. The club is able to use the lighthouse since the club has established an excellent rapport with the facility in that they know who we are, what we do, and we keep out of mischief while on the station and clean up after ourselves before we leave. Excellent advice for future Field Day site captains.

TEARA member Larry Royster, KI4FYR, has been publishing two excellent newsletters in connection with his six-meter net and the FARC two meter net. At the last meeting, Larry agreed to publish a similar newsletter for TEARA. This newsletter is called *The TEARA Two Meter Chronicles*. If you would like to be added to the list, contact Larry at ki4fyr@bellsouth.net or via the TEARA, FARC or six meter nets.

2006 marks the 50th anniversary of the Stanly County Amateur Radio Club.

A committee has gathered to generate a Special Event Station to commemorate this milestone. The committee consists of Bill (K4VET), Ed (W4KMA), Carl (W4EAT), Don (AE4AH), Paul (KD4OZI), and our President John (K3ON).

There is also a big push to get everyone to use the same PHONETICS. Wake ARES also posted the current ones at http://wakeares.org/Standardized%20Phonetic%20Alphabet.html.

Alexander County ARES installed the 147.195 repeater at a site on Linneys Mountain. Thanks to Clay, W1COX, Bradley, KE4TSC, Brian KG4TRP, John N4NNX and Jonnie W4AW for their participation.

As for the following April's Fools email, shame on the author and sender: "All codeless amateur and commercial licenses have been placed on a "conditional 30 day temporary permit" and all such license holders will have to pass an appropriate Morse code test by May 1, 2006 or face permanent revocation of their licenses." [ed. note: this is just a report of an "April Fools" prank. Please do not berate the columnist, the editor, any SERA official, or even the cat reading over your shoulder. Just chuckle or groan and keep on reading, please!]

I would to acknowledge the emails, the newsletters and updated websites that I use to obtain news for this column. Without each club's editor, this column and job would be tougher. As long as the RJ editor has the space, we can keep printing the news. Send news, updates and event notifications to WA4KE@SERA.ORG.

SOUTHEASTERN REPEATER ASSOCIATION
THIRTY-FIFTH 35 ANNIVERSARY

A TVI Problem In Clinton, Tennessee

Thomas Muncy, AG4SF

I will tell this story without names of people involved other than our club members because of the privacy act and I also would not want to embarrass anyone.

I received a phone call from a nice gentleman at the Clinton Utilities Board. This was about 10:00 AM on Thursday, March 23, 2006. He explained they had received a phone call from a very irate customer about an amateur radio operator causing interference to his Mother's television.

He told me he obtained my name on a web search. He said he needed a little information on ham radio and RF interference before he called the man back to talk with him. He said the power company handled interference on their power lines but didn't trace other interference.

He said the fellow was really upset and had called the Clinton Police Department as well.

I told him that most amateur radio operators were willing to clear up the problem if it was their equipment. I explained that if the problem was due to the ham station equipment, it was the ham's obligation to fix it or shut down. However, I explained that the problem usually turned out to be the fault of the victim's equipment, television, telephone, stereo or such. I suggested he talk with the person and if it was RF interference the Oak Ridge Amateur Radio Club would help as much as we possibly could. I told him if the guy wasn't violent and was willing to let us check out the situation to give him my name and phone number.

It was about 10:30 AM when the fellow called me. He was very nice. He told me that every day at 6:00 PM a ham operator wiped out his mother's television and she could not enjoy her programs. I asked him how long it lasted. He responded that he was not sure because it went on all night when she turned the set on. I told him the same thing that I told the man at CUB. I then told him it might not be something that could be fixed real soon, that if he and his mother would work with us we would start checking out things that evening. I got the phone number and address. Then started asking questions. Here is what I found out.

1. Starts about 6:00 PM everyday.

2. It was on both of her TVs. Also, he had hooked up a third TV with the same results.

3. Wipes out the picture completely with wavey lines and black bars.

4. Cannot hear TV audio. It buzzes.

5. Cannot hear any conversation like two-way radio.

6. Comes on and off like someone talking on a radio.

7. Doesn't know if neighbors have problems.

8. Don't really know when it started, but is very upset that the police would not help.

I explained that radio interference was a federal problem. The FCC was very slow to respond until we checked everything. I told him we would check the area for hams and then check for antennas that might be someone operating illegally.

I e-mailed Doug Campbell, N1CWR; Jeff Yawn, KF4UVT; Johnny Wait, W4LNX; Charles Hargis, K4LF, and Bob Madewell, KA4UOV. It was close to Bob's address. Bob made a pass through the neighborhood and checked for antennas. He e-mailed me back and told me he found a CB antenna nearby.

I made a check later that afternoon and found two CB antennas and what looked like a two- meter antenna. I have a small handheld TV that scans. I didn't find any excessive noise.

I called the lady at 5:30 PM and talked with her and told her I was in the neighborhood. She told me that CUB checked her house and found her doorbell was making interference. She had called an electrician and had it disconnected. I told her to turn on the TV and check it out. She said it was on and doing fine. I gave her my cell number and told her to call me if it started acting up again that evening that amateur radio people were in the neighborhood making checks for noise and interference.

I didn't see any noise driving around with my portable TV. I was scanning two meters and didn't hear any close by transmissions. So I decided to check with her again and get more information. I called her at 6:40 PM. She said one set was doing fine but the other one was all to pieces. I asked her if she could tell me when all this interference started happening. She then told me she had the cable disconnected and the trouble started. I was in front of her house and there was no outside antenna. I asked and she told me she has inside antennas.

I explained how inside antennas were not very good in our area unless you lived close to the station. I told her the cable brought the TV signal straight to the set and stopped the outside interference. I told her we would be checking all our equipment and if she had problems with ham radio operators to give me a call. It has been a week and neither she nor her son has called again.

I want to thank the guys I called on for their help and suggestions. I am now reading ARRL's book on RF interference. There is a lot of information in it. I wonder if our club needs to set up an interference committee.

Tom - a TVI committee might by a good idea. It may be never be needed but at least your club has recognized it as a proactive way to confront problems when they arise. The club I'm a member of has a TVI committee but it has been over ten years since our last complaint - and we traced that to a CB operator. As you discovered, people automatically put the blame on amateur radio, so offering some basic infomation on communications is necessary. -Bob Gault KD4NEC.

SOUTH CAROLINA

REPORTED BY
ROGER GREGORY W4RWG
102 PARTRIDGE RD.
UNION, SC 29397
(864) 427-1462
w4rwg@sera.org

Hello South Carolina,

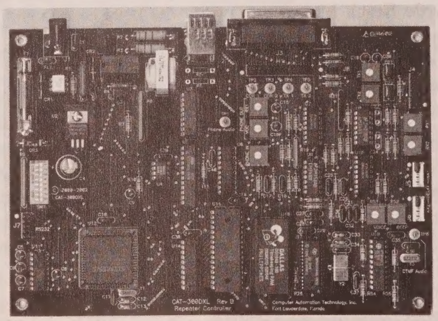
The Anderson Radio Club assisted with the Clemson Half Marathon & 5K race on February 11. The Anderson Hamfest was held on May 20 at Sadler's Creek State Park. A great time was had by all that attended. The ARC has an auction in January. Les Shattuck K4NK was the auctioneer. The auction was a success. The ARC welcomes new members Emmie Patience KA4LRM, Tom Bailey KU4UY, Matthew Sofley KI4HFL, George Kay KU4DE, Kathy Kay KF4DYJ, and Beth Kay KG4LPH.

The Blue Ridge Amateur Radio Society welcomes new members Allan Lincoln KI4MLN, and Bob Kitchen KI4MKG. The UpState Hamfest sponsored by the BRARS was held May 6 at the Spartanburg County Fairgrounds. Jim and I were there and appreciate the SERA table. The 146.610 repeater is one of the busiest in the upstate. During the month of February, they held 28 nets with 1694 check-ins and handled 38 messages. The Greenville WCARS VE team gives exams the first Saturday of each month at the Red Cross Building on Grove Road. The contacts are John Chism ND4N or Sue Chism N4ENX, n4enx@mindspring.com

The Greenville WCARS VE team gives exams the first Saturday of each month at the Red Cross Building on Grove Road.

The Charleston Amateur Radio Society provided ham radio communications for the 29th annual Cooper River Bridge Run held on April 1. The race was 10 km, point to point, from Mt. Pleasant to downtown Charleston. Approximately 30,000 runners participated in the annual event. Other club events coming up are the Subs (Submarines) on the Air, in April, and Museum Ships on the Air, in June. There will be 15 Subs participating in the Subs on the Air event. New club members are John Prescott KI4LIC; Steven Tully, AG4SR, and John King, KO4NB.

The Chester County Emergency Services Club will host their annual tailgate party on Saturday, June 17th starting at 8:00am. The location will be the same as the previous years, Chester State Park. This event has grown each year and they are looking for their biggest event ever.



CAT-300DXL Repeater Controller

The CAT-300DXL has all the features of the very popular CAT-300DX including a full feature autopatch and a Remote Base Port.

Features Include:
Voice Synthesizer ID
(20) Voice Messages
Real Time Clock
(20) Position Scheduler
Full Feature Au topatch
(100) User Speed Dials
Emergency Speed Dials
Reverse Autopatch
Remote Base Port
CW Identifier
(20) User Macros
DTMF Audio Muting
DTMF Pad Test
(4) Logic Inputs
(4) Output Switches
Optional Windows® Editor

Ordering Information
CAT-300DXL** Controller Board, Wired & Tested **$399.00
RME-1000** Rack Mount Enclosure **$99.00
ED-1000** Windows Editor **$69.00

Internet: http://www.catauto.com

The Columbia Amateur Radio Club had a special meeting on Saturday morning February 18th. They had a 6-meter loop antenna tune up and PowerPole connector party.

The Florence Amateur Radio Club welcomes new members Jim King KI4MVA, Bennie McWhite N8KWD, Joe Pennington KI4MUZ, Chris Pugh, KD5CFA, and Rachel Pugh KD5CKG. Chris and Rachel were members of the month for February. They have three children and one on the way. I am sure Rachel keeps busy. I noticed in the April newsletter that 10 club members took and passed EMCOMM Level I class. Congratulations and keep up the good work. The FARC assisted with the annual McLeod Run/Walk on March 25th. They had 8 members manning net control, 2 members working at the water stops, one member in the Rescue Squad vehicle and several members at intersections.

The Foothills Amateur Radio has 2 repeaters: 2 meters (146.700-mhz PL tone 107.2) and 440mhz (442.125). The FARC is located in Pickens, SC and their website is located at www.wt4f.org.

The Grand Strand Amateur Radio Club served as the organizing agency for 30 ham radio operators from around the State who provided communications for The Myrtle Beach Marathon. Over 4000 runners participate in the 9th edition of the race. Amateur Radio Operators served as communicators for Medical personnel at comfort aid stations.

The Greenwood Amateur Radio Society 2006 hamfest was held on January 14th at the Greenwood Civic Center. Both Jim WJ4C and I attended and manned the SERA table. We appreciate the club providing us with a table. I am told that the 2006 show was the best in 9 years. New club members are David McCall, KG4BJX, and Warren Wise, W4PY. Thanks to Jeremy Manning, KI4CCZ, the GARS has a website up and running. The address is www.w4gwd.org. New members are Les and Joyce Shattuck, K4NK and N2PTW. Les is ARRL Roanoke Division Vice Director and is well known in the State.

The Laurens Amateur Radio Society announces the passing of Eric Hughes, W4CHQ. Eric died after battling cancer for several years. He had held several offices in the club including president and vice president. He was a CW enthusiast and enjoyed working DX and experimenting with antennas. I extend my sympathy to the Hughes family and also to Glenn Scott WA4AOS for the loss of his Mother.

The Pickens County Emergency Communications Group has changed their meeting times. The Emergency Operations Center located at 1509 Walhalla Highway at 7:00pm the first Tuesday of each month. Field Day will be June 24-25 at the EOC building.

The Spartanburg Amateur Radio Club A-team has been busy. Randy, KI4CQO, and Robert, WD6ELK were on the tower and Bret, N9LPT; Mike, KI4AWC; Art, KE4EAN; John, KG4KAP; Rick, KF4IYG; Bernard, AF4IB, and My Friend Fritz, W4NTO on the ground. This was a gathering to take down Charlie Rogers', K4LNO, tower. Glad everything went well. Fritz on the ground? Must be training replacements? I extend my sympathy to Jim Quick, N4ULE, who lost his wife; Danny Glover, N4FGU, who lost his son; and Frank Lamb, K4ADI, who lost his Father.

The Union County Amateur Radio Club has cancelled their hamfest. The club has held a hamfest every year since 1995. Reasons include higher expenses, declining club membership and declining hamfest attendance. They want to thank the loyal dealers and attendees that have supported them for the last 10 years. Lasting friendships have been made.

The Union WCARS VE Team holds exam sessions the 2nd Thursday in January, March, May, July, September, and November at 7:00 pm in the Union County 911 Center training room on North Pinckney Street in Union, S.C. Contact Jim WJ4C for information, wj4c@charter.net

The York County Amateur Radio Society held their annual Valentine's Party on February 11th at the clubhouse on Squire Road. The members attending enjoyed a chicken supper and afterwards Van Brown, KG4LUT, his wife Leslie, KG4NOG, and Sal Nicosia, KB2ZZY, entertained the group singing karaoke songs. On February 25th members held their annual BBQ Fundraiser at the Auto Zone in Rock Hill. Members of the YCARS provided communication for the Patriot's Trail Bicycle Race on April 2nd. Congratulations to Wayne Reeves, KD4RNP, on the birth of a new grandson Ben Reeves. Also congratulations to all of the net controls for a great month during the month of March. Connie Hall – K4CON, the Net Manager reported that a total of 1065 check-ins were on the nets during March. Lonnie Hall W4LON was awarded a beautiful plaque from John Bostic WB4GOV. The YCARS welcomes new member Randy Zavetz, KI4NBA. Visit the YCARS web page at www.ycars.org, and don't forget to sign the guest book!

TENNESSEE

REPORTED BY
BOB GAULT KD4NEC
221 CEDARWOOD TRAIL
CLEVELAND, TN 37312
KD4NEC@SERA.ORG

As I was preparing this article, west Tennessee hams had their hands full with a series of tornadoes that's being called the worst severe weather outbreak in seven years. Over 15 deaths occurred in the volunteer state, which was the hardest hit, and damage estimates are already in the millions of dollars.

Damage assessments are still underway and it could be several weeks before emergency management officials are able to finalize their reports. Governor Phil Bredesen has asked for a federal disaster declaration for the two counties that suffered the worst damage.

It was just a few weeks ago that severe weather preparedness measures were in the news during the National Weather Service sponsored campaign to raise awareness of the dangers we face from super cell thunderstorms. Severe Weather Awareness Week was observed in several southern states from February 19-24.

While we haven't seen any early reports of amateur radio nets, I feel certain that folks in this area were busy during the early spring outbreak of severe weather. This should serve as a reminder for all to be prepared!

Amateur Communication Service (ACS) has started twice-monthly sessions getting members prepared for the ARRL's emergency communications course. The Bradley County amateurs are meeting at the Emergency Management Office on the 1st and 3rd Tuesdays for a couple of hours to review the material. Once the process is complete in several weeks, plans are to get everyone certified.

I've never attended the Gray Tennessee hamfest but there have been some good reports over the years. Apparently the fest was discontinued but there is good news. Ronnie Byrd, AI4BT, sent me a note stating plans for a revival of this popular event are moving forward.

The date he gave me is November 11, 2006. There is more information at www.grayhamfest.com. Ronnie says to check back often as updates are being added.

Let me encourage Tennessee groups getting ready for a spectacular field day to not forget they can send pictures for the August issue of the Journal. J-pegs are preferred and they can be sent to my SERA address. But remember, our deadline is July 1st, so don't delay.

Tennessee ARES members may have carved a piece of history at a February meeting hosted by District EC John England, N4XYC. It seems the Tennessee boys and girls crossed the state line to the Carpet Capitol of the World for a meeting of the ten-county East Tennessee group. Who knows this could have been the first "out-of-state" gathering for county emergency coordinators and ARES members. Both were well represented at the meeting which by the way was held in conjunction with the Dalton Georgia hamfest.

The Radio Amateur Radio Club of Knoxville sponsors a net for youth each week. YARN (Youth Amateur Radio Net) is heard on 147.30 the W4BBB linked repeater on Tuesdays at 7:00 PM.

Word is already out that the club's Field Day activities will be held at Fort Dickerson Park on Chapman Highway.

The Oak Ridge Amateur Radio Club takes pride in their website. Boasting loads of information about the club and other area amateur radio activities, it can be found on any of the search engines by typing in ORARC. APRS and how it is used by the National Weather Service was the topic for presentation at the club's February meeting.

The feature for the February meeting of the Bristol Amateur Radio Club was Red Cross participation in Carter County. The group brought several representatives to both explain and show what they have been doing.

Meanwhile, a recent club newsletter reports progress is being made getting a local two meter repeater on the air. Problems getting power to the mountain site have delayed efforts to put the 146.925 machine on the air.

The Bristol folks are also making plans for a special events station in commemoration of the city's 150th anniversary.

Finally, I want to thank the clubs who send me a newsletter each month. Your generosity is appreciated. **Does your club have a newsletter or other means for distributing club news through snailmail or e-mail? I would appreciate being added to your distribution list at the address listed in the Journal.** That way you can be featured next month.

Till next time, 73's from Tennessee.

KG4BKI@SERA.ORG

Wythe County Ham Accused of Interference.

On Wednesday morning March the 8th, Dennis Alford, KC4VGA, and his wife Brenda were surprised by a visit of a Wythe County Sheriff's Deputy and an officer of the Wytheville Police Department. They were executing a search warrant. The officers seized everything from Mr. Alford's shack: radios, power supplies, scanners, computer, tuner, and even his log and notebook.

The Wytheville Enterprise of March 11, 2006 described the search warrant application as stating, "On or about Jan 7, 2006, the Wytheville Police Department was experiencing extensive interference with its official radio dispatch. The interference contained audible clues that the transmissions were emanating from the Wytheville Wal-Mart." On that date, Wytheville P.D. Officer, D. L. Wall was sent to investigate. Upon finding Mr. Alford with radio equipment in his possession, an inspection of the radio was requested and Mr. Alford consented to an inspection of the radio and allowed the officer to take the radio with him.

I talked by telephone with Mr. Alford and he told me the radio was an Alinco HT that the previous owner had modified to transmit out of the amateur band. With permission of the Wal-Mart management, he used the radio on their business frequency while working. He said that it was possible that when he had the radio in his pocket he may have inadvertently transmitted. Concerning the radios in his home, he said that the radio that would have been capable of interfering was not even hooked to an antenna.

The investigator on this case is Gary Davenport of the Wytheville P.D. I talked with him on 5 April 2006. He indicated that the case was still under investigation, that "signal fingerprinting" had confirmed that Mr. Alford's radios were the ones that had caused interference on numerous occasions, and that the interference had stopped since the radios were seized. The investigation is now focused on whether or not the interference was deliberate, according to Mr. Davenport.

Mr. Alford's search warrant cited two Code of Virginia statutes that caught my attention. The warrant cites statutes 18.2-165.2 and 18.2-190.2. Paragraph 165.2 is not a concern as it is related to causing interference. It states, in part:

§ 18.2-165.2. Unlawful interference with emergency two-way radio communications; penalty.
A. It shall be unlawful for any person to knowingly and willfully (i) interfere with the transmission of a radio communication, the purpose of which is to inform or to inquire about an emergency or (ii) transmit false information about an emergency.

My concern is centered on Paragraph 190.2, which states in part:

§18.2-190.2. Possession of an unlawful electronic communication device or equipment etc., used to manufacture such device; penalty.

A person who knowingly possesses (i) an unlawful electronic communication device [ ] shall be guilty of a Class 6 felony.

An "unlawful device" is defined in Paragraph 18.2-190.1, in part:

§18.2-190.1. Definitions "Unlawful electronic communication device" means any electronic communication device that has been manufactured, designed, developed, altered, modified, programmed or reprogrammed, alone or in conjunction with another electronic communication device, so as to be capable of facilitating the disruption…………

Note that it says "modified, so as to be capable of facilitating disruption. This would make my Yeasu FT-840 that's been modified to operate on 60M unlawful because it is capable of transmitting into a local Sheriff's 30Mhz radio system.

Your correspondent is far from being a lawyer, but I have some concerns about being in possession of a radio that could be considered illegal. This could potentially include every MARS operator and almost everyone who has been on 60M.

I found the complete text of the code of Virginia at http://leg1.state.va.us/000/src.htm. Hope some legal eagles out there will look into this for all concerned hams in Virginia.

*L*ong *L*egged *F*rog Honored

Jim Dickinson, W4LLF, was recently honored for his years of dedicated service to the Metropolitan Repeater Association (MRA). Association President Jim Clark N4GAU gives this report:

Jim Dickinson, W4LLF, has been our only treasurer since the repeater went on the air back in '82. He rarely missed a meeting and his books were perfect. Every audit was a waste of time other than getting together and enjoying a meal and the friendship. He would worry if he was off by a penny. That type of dedication is very rare today. He has manned the MRA table at FrostFest every year. He is the type of member every group would love to have: dedication, eye for detail, and above all honesty beyond reproach. It was a small way that the MRA could honor such a dedicated Amateur and a dear friend.

Richmond

The Metropolitan Repeater Association (Richmond, VA) operates the 145.43 repeater, which is a large footprint repeater with its antenna over 800' AGL. The 145.43 has been a full member of SERA since 1982.

FrostFest

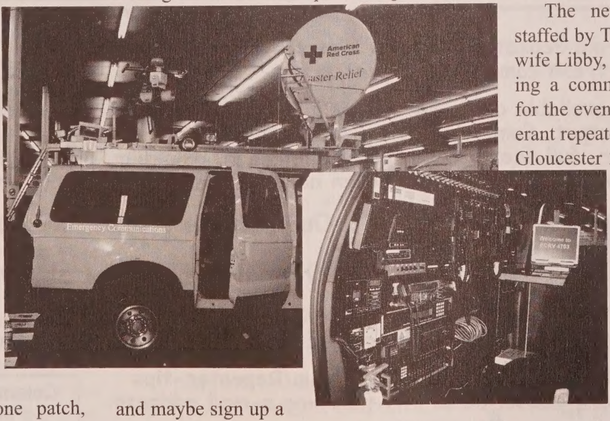
February 19th was the date of this annual event that I think of as the start of the hamfest 'season' in Virginia. I don't usually look for official attendance reports when I go to an event. I just report what I think the overall feeling of the event had for me. This year it seemed there were quite a few empty tables, but attendance seemed about the same as it has been in the past few years, judging by how far I had to park from the entrance.

Positive signs included the return of Austin Amateur Radio and the presence of a radio manufacturer, Elecraft. There was a nice slate of forums and I attended the one hosted by Virginia Section Traffic Manager, Steve Krumm, KV4AN. Steve gave a brief history of the National Traffic System (NTS). He also emphasized the importance for all amateurs to have a basic understanding of traffic procedures. For CW beginners he recommended the

Jim Dickinson, W4LLF, receives Service Award from Metropolitan Repeater Assocation President Jim Clark, N4GAU.

training provided by the Maryland Slow Net (MSN). Contact Steve, kv4an@arrl.net, for the times of the net and guidance for participation on the MSN and traffic in general.

On display at FrostFest was one of the American Red Cross' Emergency Communications Response Vehicles (ECRV). This vehicle is a bit hard to describe as they have tried to cover all the bases in one place. For example, there are 16 antennas on the roof and a storage locker for additional antennas. The console between the front seats has seven different radios. The rear console (a floor to roof arrangement just behind the rear doors) has additional uhf/vhf/hf radios, amp, phone patch, weather station, TNC, VCR, and more.



There are 9 ECRVs deployed around the United States. This is the one home stationed in Manassas, VA. You can check this out on their web site, www.ecr4703.org.

I noted the number of clubs that had tables with nice banners, brochures, and applications at their tables. I may not have noticed club tables very much in the past, but they seemed more prevalent than in the past. That's good as the club table gives members a place to gather, and maybe sign up a few new members.

FrostFest is sponsored by Richmond Amateur Telecommunications Society, www.rats.net. An online report of the event with pictures can be found at www.frostfest.com.

SpringFest

The Chesapeake Amateur Radio Service (CARS) held their annual event in a new location on Sunday, 2 April 2006. This is a larger venue than last year, a Moose Lodge that is usually a Bingo parlor. There were adequate tables indoors; there was a nice row of sellers in the tailgate area. The report is the vendors were happy. This was a very relaxed and comfortable hamfest. The food was good too!

For the second year in a row, I won a door prize. So, you know this is getting to be my second favorite 'fest. (After the Bronco Club Picnic) I bought a set of circularly polarized antennas and a rotator that work for elevation.
The CARS web site is www.qsl.net/cars.

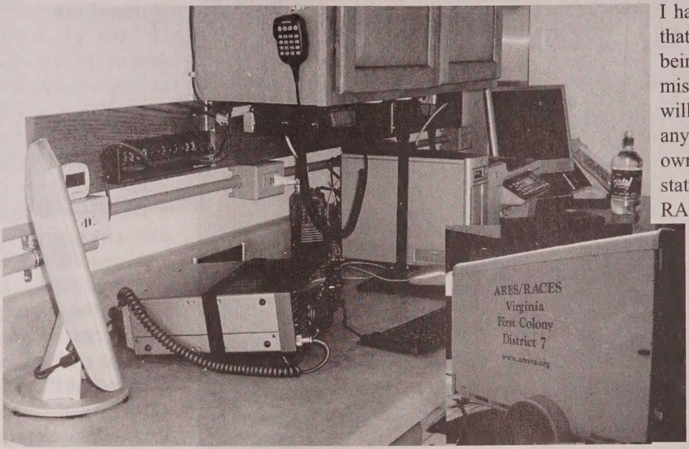
Daffodil Festival

On 2 April 2006 I traveled to Gloucester Court House, VA to see the Amateur Radio support of the Daffodil Festival. The supporting group was the District Seven ARES/RACES group. (District Seven is Gloucester Co., York Co., James City Co./Williamsburg, Newport News, Hampton, and Poquoson.) This is one of several events where the group provides traffic control.

The net control station was staffed by Tom Goyne, N4NSP and wife Libby, W4ELK. They were using a commercial UHF frequency for the event staff, Tom's UHF itinerant repeater on Amateur UHF, the Gloucester 2M repeater on 145.37, Sheriff's Office dispatch, and a 2M simplex frequency. Most of the Amateur radio activity was on the UHF repeater. Things could get pretty busy from time to time. This was the first time I had a live look at Tom's portable repeater (as seen in an earlier issue of the RJ) and to use it.

This is one of several events that District Seven ARES/RACES supports with traffic control and parking services. The donations received have been used to develop a self-contained portable station called the "White Trailer". The station can be powered by solar panel charged batteries, by a portable generator, or it can be plugged in and powered through an Astron power supply.

The trailer has two operating positions, both with computers. The computers are linked by a wireless router. Both positions have Kenwood dual band radios; a TMD700A and a TM-G707A. A Kenwood TS570 provides HF capability. Everything about the installation is very nicely done; all wires in conduits, anything that can move is strapped down, and comfortable chairs. District Seven is to be commended for their fine work on this Emergency Communications resource.



Arlington County (ARLCO) Revisited

In the last column I used a situation in Arlington County to illustrate the potential for problems that may arise as more jurisdictions require background checks for access to government buildings. David Jordan, WA3GIN, felt that I had created the impression that background checks were being initiated without permission of the individual. I will allow David to correct any misunderstanding, in his own words, and to provide a status report of the ARLCO RACES team now in place:

> SERA incorrectly stated as fact that Arlington County intended to run background checks on ARES members without their knowledge or permission. Such an assertion is completely baseless. In fact, ARES was informed as part of a county readiness review, that if its members intended to provide support services for Arlington County. County policy now requires that they obtain "new" county credentials to enter government buildings and facilities, credentials that are issued "only" upon successful completion of background checks, which are conducted by the county Sheriff's office

COMMERCIAL REPEATERS FOR AMATEUR USE !

Trade in your old repeater on a new 2 meter, 220 or 440 factory fresh commercial repeater.

With wattages available of 5, 25, 40, 50, 100, 180, or 400 watts of output. Complete packages available that include repeater, full featured computer controller, amplifier, preamplifiers, power supply, circulators, duplexers, cabinets and even hard lines and commercial antennas.

pursuant to the county's privacy policy and applicable law. ARES was invited to participate in the process, as RACES intended to do, so that local Amateur Radio volunteers could obtain prompt access to county facilities if needed.

While other volunteers throughout the National Capital Region (including Arlington County) have embraced the Arlington County policy by submitting character background check data and obtaining county credentials, Arlington ARES Emergency Coordinator (EC), Allan Bosch, KO4ALA, has stated emphatically that ARES/ARRL policy does not allow him to disclose the names of ARES members because of privacy concerns. The ARRL Virginia SEC supported that view. As unrealistic as the ARES/ARRL policy is in this post-9/11 world, the county respects ARES choice to make that determination. However, for Arlington County, the issue is not privacy, but rather access to the facilities of served agencies in time of need. For obvious reasons, government officials are very concerned about protecting constituents that may be sheltered in place, infrastructure and other assets during any emergency. One of the first lines of defense would be to "know" who and why someone has access to a particular facility. There are few federal, state or county facilities you can enter in the National Capital Region these days without proper credentials, and you can't step foot near the operations center of any government agency without them. In an emergency, Arlington County may place even greater restrictions on access to government buildings, grounds and vehicles.

Arlington County is geographically the smallest county in the United States (28 sq. miles) but it is home to the Pentagon, Washington National Airport, and many other federal, state and county agencies. The county courthouse and Emergency Operations Center are located less than two miles from the White House. The brain center of the county's public services communication system is co-located in these facilities. The bottom line is that if Arlington County grants access to these sensitive, essential, critical infrastructure facilities, it wants assurance ahead of time that it will be granting access to volunteers of good character, as best as a background check can provide such assurance. That policy is here to stay and there won't be any exceptions made for ARES or RACES. We understand the Red Cross has also implemented character background checks into their credentialing process.

Understandably, some ARES members are not happy with the county policy because it stops ARES volunteers at the door of the EOC. Arlington County did attempt to reach out to Arlington ARES for nearly a year, through the Arlington ARES EC, but were rebuffed each time. Again, that is ARES' choice and we won't second guess the decision. If ARES is satisfied being relegated to parking lot or curb-side duty at county facilities, that's also ARES' choice.

Thankfully, a number of Amateur Radio volunteers in the National Capital Region, including ARES members, have gladly submitted to character background checks and are undergoing training that will enable support to Arlington County as Amateur Radio volunteers. Currently, there are over thirty RACES volunteers who have submitted and successfully passed the character background process. More than enough to cover every square mile of Arlington. Those volunteers have volunteer affiliations with the National Red Cross, Sky Warn, REACT, CERT and ARES. Twenty five non-amateur county employees and local volunteers are currently signed up to take FCC Technician license training. Arlington County appreciates their cooperation and devotion to public service. These volunteers are serving the county!

For more details about the Arlington County RACES program readers can go to http://www.volunteersolutions.org/acvo/org/9176484.html .

David Jordan
Chief Information Security and Privacy Officer,
OEM Emergency Support Function #2 Lead,
RACES Officer
Arlington County Government, Virginia

(Since Alan Bosch, KO4ALA is being mentioned for the second time in this column, it is appropriate to allow him to comment here also.)

There are several issues involved with the ARES/RACES situation in Arlington: background checks, ARES' "readiness to serve," and access to its member information.

The first two are actually moot. As is understandable these days, there is some apprehension about background checks generally among ARES members, but their necessity under today's national security posture is recognized and accepted. As for "readiness to serve," a capability/contact statement was provided as soon as it was requested by the OEM assistant director last fall. (enclosed)

To sum up the member information issue as it developed: "RACES RO David Jordan directed that ARES turn over its member information so that he could have direct contact. ARES declined to do so without express informed consent of the individual members concerned. Mr Jordan provided no information we could pass on to members as to why. Thereafter, Mr. Jordan decided to start his own organization."

By way of context, two things must be noted. First, I told Mr. Jordan that, as ARES EC, I would be happy to forward any information on programs, plans, etc., which he would like brought to the attention of the crew. That offer, which still stands, has never been used.

Second, though both the ARES weekly net and the Arlington's club meetings are open to all interested parties, Mr. Jordan has never appeared in either venue. Nor has he contacted anyone about making a presentation on his efforts.

Since well before Y2K, Arlington ARES has stood ready to serve -- and is ready to help today.

WEST VIRGINIA

REPORTED BY
RICHARD CLEMENS KB8AOB
102 HICKORY STREET
BUCKHANNON, WV 26201
304-439-1248
KB8AOB@SERA.ORG

January 2006

I woke up early on Monday, January 2, not because I wanted to or because I had any plans for the day, but I had left my computer on and a strong electrical storm was moving through Buckhannon. This part of West Virginia often experiences such storms but not at this time of the year. When they do happen in the night or early morning hours I will typically stay up until the storm settles a bit and becomes just rain. That Monday morning was no different.

The Buckhannon River flows past the Sago Mine that is hidden by the trees on the left.

I turned off the power to my computer and unplugged the power strip that feeds the ham radio equipment in the same room. Rather than going back to bed, I half-sat half-lounged on the living room couch. The next 10 or so minutes were punctuated with bright flashes quickly followed by the loud rumble of thunder as the storm was very strong and very close. Still half asleep, I remember one particular rumble seemed odd that morning. I did not realize just what the distinction was but do remember that it was some-how very different and peculiar.

It would be many hours until I learned of the mine tragedy at Sago only a few miles south of where I live. I teach at West Virginia Wesleyan College, which was closed for Christmas break and I also serve the City of Buckhannon in a part-time role. The City was closed due to the New Year's holiday but when I learned of the extent of the problem and that City Hall had opened I went downtown to see if I could help.

The Sago Baptist Church is peaceful again on this early spring day.

The City of Buckhannon is a small town located in the northern portion of Upshur County and provides many essential services for the region. It does not directly serve the very small community of Sago, nor the dozens of other small mining, timbering, or residential communities in the southern part of the county. The mayor of the City had called a meeting of department supervisors and declared an emergency allowing City employees and equipment to extend beyond their typical limits and assist in any way possible in the disaster.

Upon my arrival at City Hall, I not only found a number of municipal employees actively engaged in providing much needed assistance but also the Assistant Director of the Upshur County Office of Emergency Services, Steven Milligan, W1IEU. Steve had set up a command center in the council chambers to assist in the coordination of resources and to provide information to the media.

While it would be many hours until the fate of those in the mine would be determined, the hundreds of family members, friends and other individuals that had arrived to wait at Sago needed care as well. Less then fifteen minutes after the media announced that food and other necessities would be accepted at City Hall for transport to Sago the much needed supplies started to arrive. Bottled water, all types of food, blankets, cell phones, even needed tools and refrigerators arrived from individuals and business both local and in the region. These items were immediately sorted and then dispatched by police or fire crews to Sago or one of two emergency shelters that had been established.

In the days that followed, the 2006 Sago Mine Tragedy became the focus of media from around the world. Never before had the small town of Buckhannon been faced with the security, medical, and social issues that had been thrust upon it so early that Monday morning. Did amateur radio provide assistance in this time of need? Not directly. Most communication systems were up and running even if some cellular systems were limited to analog connections. Coverage by emergency radio systems was in full operation with special frequencies being activated to help separate the critical traffic of the emergency from that of routine business. Did the ham radio training and tradition of helping others in need appear? Most certainly it did. And it is with that concern for others and for providing assistance in any form or fashion that makes amateur radio such a great resource in this nation and world.

Be proud of what you do, prepare now for the emergency that I hope you never have to experience, and plan on assisting others when the need does arise.

Prayers to the families of the lost miners and 73 to the lone survivor Randal McCloy, Jr, KC8VKZ.

And Now a Word From Your Editor.........

The first thing you'll notice about this column is that there are *far* fewer entries than you're used to. First off, this had to be put together in short order by a couple of folks who were drafted at the last minute... and I didn't want to whip them *too* hard, lest they decide to make me do it. This is due to two reasons: first, there aren't as many hamfests being produced this year as in years past. Second, we don't always hear from folks who are planning hamfests.

To be sure to get your hamfest listed here, just send a quick email message to < hamfest@sera.org > telling us the date and location. Be sure we have a way to contact you in case we have a question.

The second thing that you will notice is that the "*" entries no longer have a date entered. As a courtesy to hamfest sponsors, both established and prospective, it has been the practice for the Hamfest Calendar Editor to make "an experienced and educated guess" about the date for a hamfest. Because the new folks down the hall in the Hamfest Calendar office have neither the experience nor the education of the previous editor, we'll have to stop doing that for a while. SERA *does not* "assign" dates on the "hamfest circuit." Dates are chosen by the hamfest sponsors.

Thanks for all your input to this column. See you at the hamfests!

Tom Gallagher
N4IOZ
Editor
n4ioz@sera.org

Well, I don't much know what to say--- but you can see I'll fill up my space, anyway! Many readers probably have a few questions about who I am, where I came from, and what I plan to do. As members and supporters of one of the largest and most respected frequency coordination associations, you have some right to know the answers. In this, my first column, I'll attempt to do just that.

When The SERA hung out the "help wanted" sign last fall, I knew that I had to let the board know that I was willing to help out, if I could. I already had seen the dedication and investment some folks had made in the publication, not only by late editor Wayne Williams, K4MOB, but by several other people who I have gotten to know over the years… some of them not even licensed amateurs, but nonetheless committed to what the organization does. The magazine is printed by a good friend of Wayne. Many of our advertisers support us, not because of the business advantage they gain, but because they believe in the mission of SERA as the umbrella organization of the state frequency coordinators. I believe in that mission, too. That's why I took the job.

Taking over the job of editor is being made easier by a number of people. First off, Gary Pearce, KN4AQ, has left me with a "working prototype" on which to build the next couple of issues. Beyond that, he's handled all the advertising for this issue, so that I only had to plug in the updated material. Next, the state correspondents have all been great doing their part: Charles, K5ASL; Pat, KD4PWL; Mike, WA4KE; Roger, W4RWG; Bob, KD4NEC; John, N3ACK; Fred, KG4BKI, and Richard, KB8AOB. These eight guys really make the magazine. Jerry, up at Royal Printing, put together the cover in less than a day--- I was told he was a wizard, and the magic he does leaves no doubt in my mind. The SERA board of directors deserve recognition here for taking a chance on someone (me) that they did not know, personally. Most of all, my wife Jean Marie has stood behind me these past couple of weeks offering advice on how to do the composition, proofing and correcting, doing "fixes" and layout, and leading me through a serious upgrade to a really high-end desktop publishing software package.

The additional columns add even more to this magazine, and I hope that you'll enjoy the contributions of Randy, David, and Frank to this issue as much as I have. If you miss the columns from our other regular contributors, don't worry! Nobody has been "fired" and I hope that we hear from them in August. This issue, in particular, has been literally an on-the-job training experience, and I didn't get everything in that I wanted.

Then there is someone who deserves more recognition than he gets, although he is really too modest about his longstanding contributions to the organization. Thank you, David, and to Sharon and Bethany, too.

That's not to say it's been a piece of cake, either: the past four months have seen me finishing up my student teaching and compiling my professional portfolio, and beginning this undertaking has meant a significant upgrade to our home computer systems (and all the file-moving and such that doing that entails). What's more, I decided that the changeover in editors would be a good time to adopt the next generation in desktop publishing software--- while it's been great to use a powerful tool, the occasional "lost typeface" and other incompatibilities is somewhat annoying. Jean Marie's new computer is still sitting in a temporary location, and to use the new software she sits on a camp stool and hunches over the keyboard and display balanced on a cardboard box. However, once this is printed and in your hands the biggest hurdle will be overcome and things should smooth out for a while. Gary has done a great job shoehorning his editorial duties between increasing personal and professional obligations. Circumstances allowed me to pick up sooner than I anticipated. The transition has been smoother than we had any right to expect. I apologize now if I accidentally neglected something--- just let me know, and I'll do my best to make it right.

Finally: who am I? I was first licensed in the early '70's as WN4DVF (if anyone can send me one of my old QSL cards, I'll personally pay their SERA dues for two years!), but those were the days when novice licenses could not be renewed and as a teenager I found other things to do besides study for the upgrade. However, when I was in tech school in the early '80's a fellow sold me a Regency 2m rig--- crystal-controlled--- and I was financially motivated to get my technician license. I heard the local guys talking on the local WA4GIC (now W4NC) repeater, so it was easy to meet up and get involved in the local club. I've done a number of things over the years: taught license classes, been the club technical chairman, been club officer, volunteered in ARES, and acted as volunteer examiner. I've even helped run a hamfest or two, which leads me to a hint for some of you who may have met us: Winston-Salem Hamfest and Krispy Kreme donuts! So, this is not just an "out of the blue" task for me.

Enough about us for now. I want to hear about you! Each of our state correspondents has an email address. Please make sure your local club is sending them a newsletter, or just drop them an email letting them know what's going on in your town. Are you doing something interesting with ham radio in your town, especially above six meters? Shoot us an email or send us a letter! Pictures are great!

Thanks for reading, and especially for being a member of SERA. I'll see you in August!

73, Tom Gallagher, N4IOZ

Depend on Alinco for leading edge technology and compact design

Pocket one of these "Maxi-Micros"!

No one has more experience with "pocket radios" than Alinco. Sure, they're "micro sized" but very affordable, ultra light and ultra thin. Yet they pack a "punch" when it comes to performance!

Here are some good reasons why you should own a maxi-micro:

- You can always carry a radio; that's pocket sized and light weight.
- Easily fits in pocket, purse, backpack or briefcase.
- Perfect for repeater or simplex operations.
- An ideal "remote mic" for your cross-band transceiver.*
- A great "backup" HT with long battery life.
- Great for camping, ski trips, road trips or emergencies.

Alinco's Maxi-Micros are rugged, easy to program and have excellent audio.

ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

Coming soon to your authorized Icom dealer!
